3.2 Data source 31
3.3 Data modelling 43
3.4 Data sharing 52
3.5 Data updating 57
3.6 User experience 59

Chapter 1: Introduction

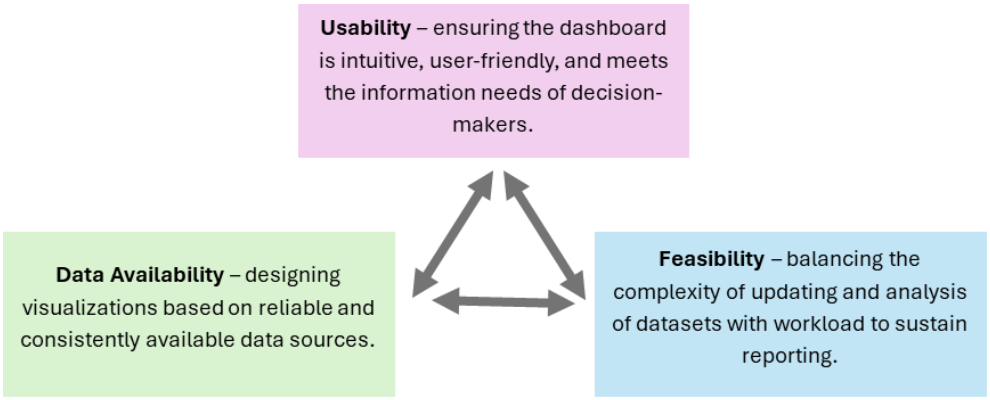

1.1 Audiences and purposes

This dashboard is designed for executive members and members of the Senior Management Team (SMT). For executive members, the dashboard provides a high-level overview of the organization through a single, integrated platform. For SMT members, it serves as a common and trusted source of up-to-date information to support evidence-based decision-making.

1.2 Development

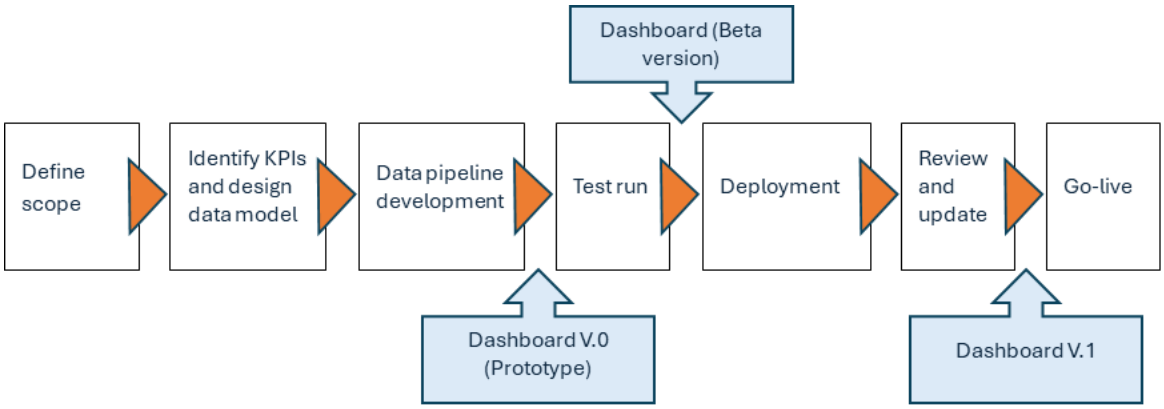

Guiding principles

The dashboard development process is guided by the following principle to ensure utilization and sustainability.

Process

The development process is guided by the following workflow diagram, ensuring that designated staff from GRANT A are well communicated and their inputs are carefully considered.

Timeline

Phase 2: Development of Grant Management Tools began following the planning meeting held on 20 June 2025. The initial dashboard design was discussed with GRANT A and documented in the Inception Report. GRANT A's requirements were identified through the organizational capacity assessment process. The proposed dashboard design was presented during the Zero Draft meeting on 14 October 2025. Feedback was reviewed and revisions were made through follow-up meetings in November and December 2025. The Version 1.2 (Go-Live) dashboard was released in late December 2025.

Handover process

To ensure a smooth transition and long-term sustainability of the dashboard, a structured handover process is conducted through five sessions, each covering a specific topic related to dashboard maintenance and use. The sessions are designed to progressively build capacity, starting from data extraction and moving through data processing, DAX and visualization, and finally updating and sharing the dashboard.

MON	TUE	WED	THU	FRI
15-Dec	16-Dec	17-Dec	18-Dec	19-Dec
		Data extraction (2 hrs) - Prevention - Care and support - Training	Data extraction (2 hrs) - CSS, CFM and SHG - Overview and update - Discussion	
22-Dec	23-Dec	24-Dec	25-Dec	26-Dec
Power BI basics (2 hrs) - Data source - Data modelling - DAX: Overview and update	DAX (2 hrs) - Prevention - Care and support - Training - CSS, CFM and SHG			
29-Dec	30-Dec	31-Dec	01-Jan	02-Jan
Updating (1 hr) - Discussion on schedule and updating process				

Dashboard handover sessions 1 of 5: Data extraction | Meeting-Join | Microsoft Teams - 17 DEC
Dashboard handover sessions 2 of 5: Data extraction | Meeting-Join | Microsoft Teams - 18 DEC
Dashboard handover sessions 3 of 5: Data processing | Meeting-Join | Microsoft Teams - 22 DEC
Dashboard handover sessions 4 of 5: DAX and visualization | Meeting-Join | Microsoft Teams - 23 DEC
Dashboard handover sessions 5 of 5: Updating and sharing | Meeting-Join | Microsoft Teams - 29 DEC

In addition, a hands-on data updating session is conducted, during which the consultant worked alongside the GRANT A team to update the dashboard using newly released data.

1.3 Scope of the dashboard

'Dashboard' is an overarching term for the grant management tool, which is a Power BI report (analytical report) with multiple pages. In line with the action items identified during the capacity assessment, each page is designed with a specific purpose.

Content	Purpose
Overview	Provide a high-level view of grants received and implementing activities aligned with GRANT A's strategic directions
Updates	Track the current implementation status and lists of townships where activities are being suspended
Population size estimate (PSE)	Track and review the size estimate for different key populations
Strategic Direction 1: HIV Prevention	Generate insights from KPIs related to activities that reduce the spread of HIV transmission
Strategic Direction 2: Care and Support	Generate insights from KPIs related to activities that improve the health and well-being of people living with HIV (PLHIV)
Strategic Direction 3: Community Resilience	Generate insights from KPIs related to activities that strengthen community resilience to HIV and related challenges
Strategic Direction 4: Network strengthening	Generate insights from KPIs related to activities that enhance collaboration, partnerships, and support networks
Financial management	Budget: Provide an overview of funds received and allocation across strategic directions. Financial: Analyze expenditure trends, disbursements to subgrantees, and budget variance to ensure financial accountability and efficiency
Capacity building	Provide an overview of training for the critical workforce involved in HIV prevention, care, and support
Insights	Analyze program performance and make comparison for HIV prevention and care and support activities

Metrics or Key Performance Indicators (KPIs)

Area	Indicator and description
Program related	• Geographic coverage – Number of townships, disaggregated by activity, subgrantee and grant • Implementation coverage – Number of townships where activities are actively conducted • Program performance – Summary information, progress towards targets, achievements trend and analytics
Financial related	• Budget allocation – Planned investment, disaggregated by grant and strategic direction • Budget Utilization Rate – Percentage of disbursed budget that has been spent, disaggregated by grant and subgrantee • Cost per beneficiary – Expenditure for each beneficiary who received specific types of activity

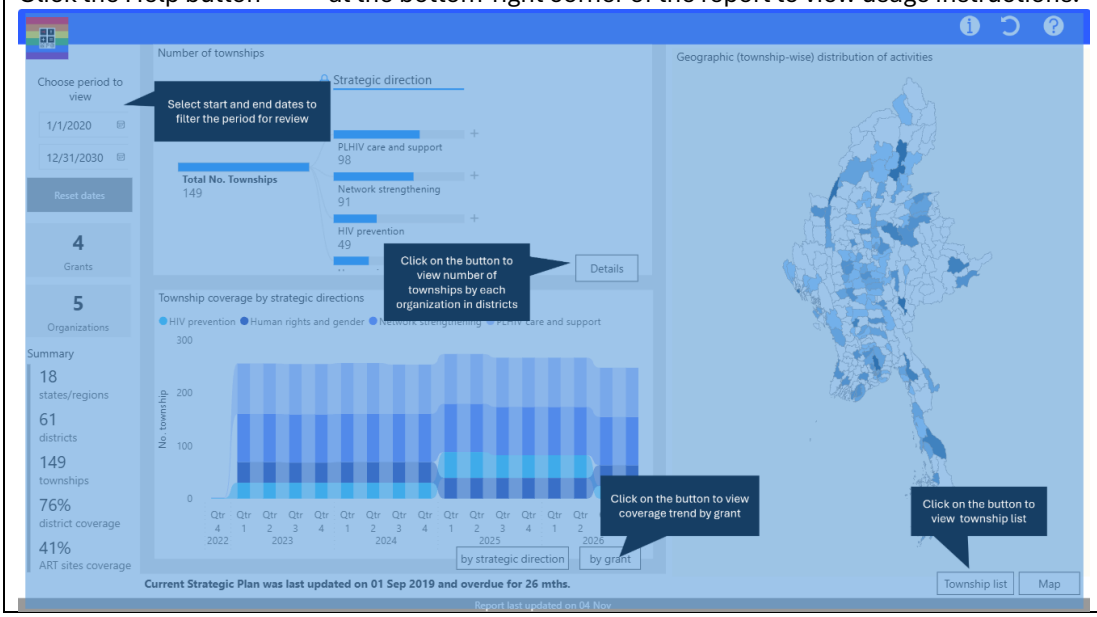

Chapter 2: User Guide

This chapter provides guidance on how to navigate the dashboard, use filters and slicers, interpret visuals, and extract insights for reporting and decision-making.

2.1 Interaction

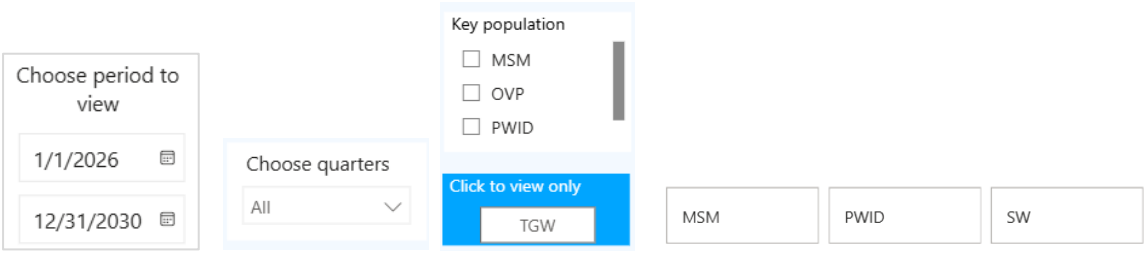

Power BI allows users to explore and customize visuals through slicers, drillable visuals, buttons, and tooltips.

Click the Help button at the bottom-right corner of the report to view usage instructions.

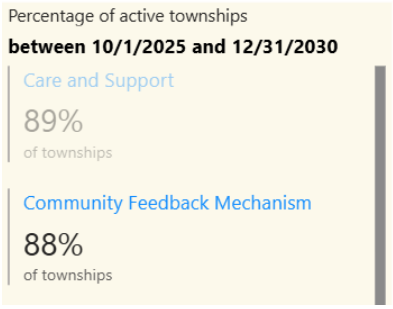

Slicers

- Use slicers to filter visuals by time period or other data categories such as key population, grant, etc. Date slicer and category slicers are used in this report.
- Slicers can be in different formats, such as sliders, drop-down lists, check boxes and tiles.

Drillable visuals

- Click on visual elements to view more detailed information or to navigate to lower hierarchy levels (for example, from region to township).

Grant	Org A	Org B	Org C	Org E	Org F	Total
Grant B	**2**					**2**
Grant F						
HIV prevention						
Ayeyarwady	1	1				**1**
Bago (East)		2				**2**
Bago (West)		3				**3**
Kayah	1	1				**1**
Mandalay	2	2	7			**7**
Rakhine	6				6	**6**

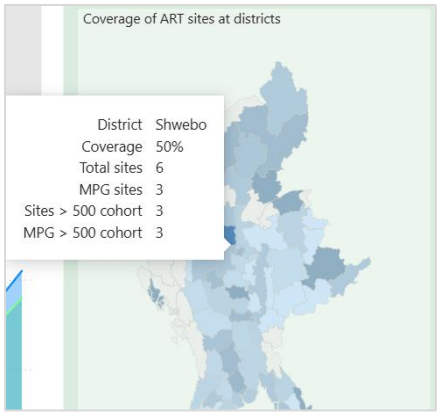

Buttons

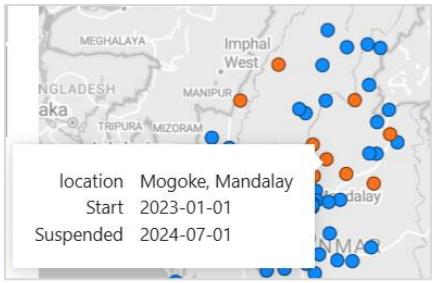

- Click buttons to switch between different visuals or views within the report.

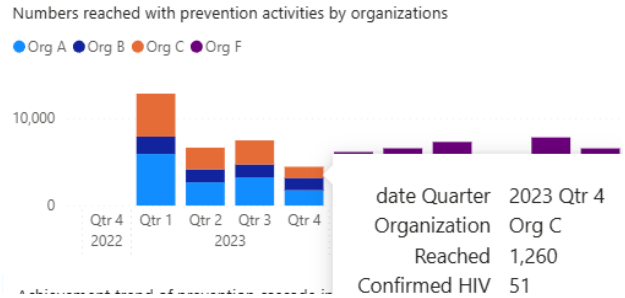

Tooltips

- Hover over a visual element (such as a map area or a bar in the chart) to see additional details about that data point.

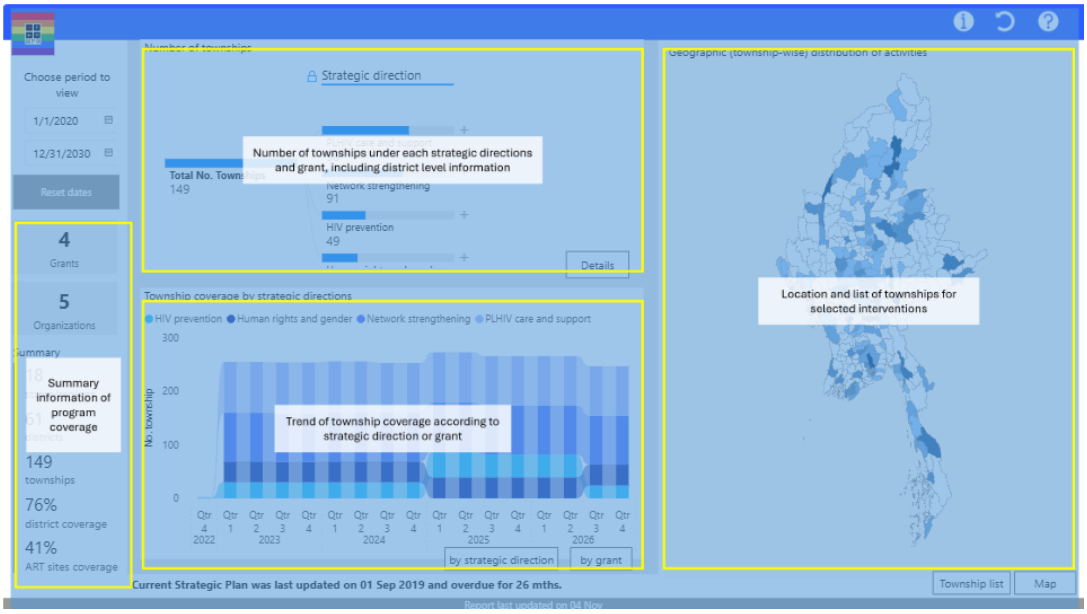

2.2 Interpretation

Power BI is capable to filter, summarize and analyse the data and display them through different types of visual to generate data insights.

Click on help button ⓘ at right bottom corner to view the information about the page

Analysis types

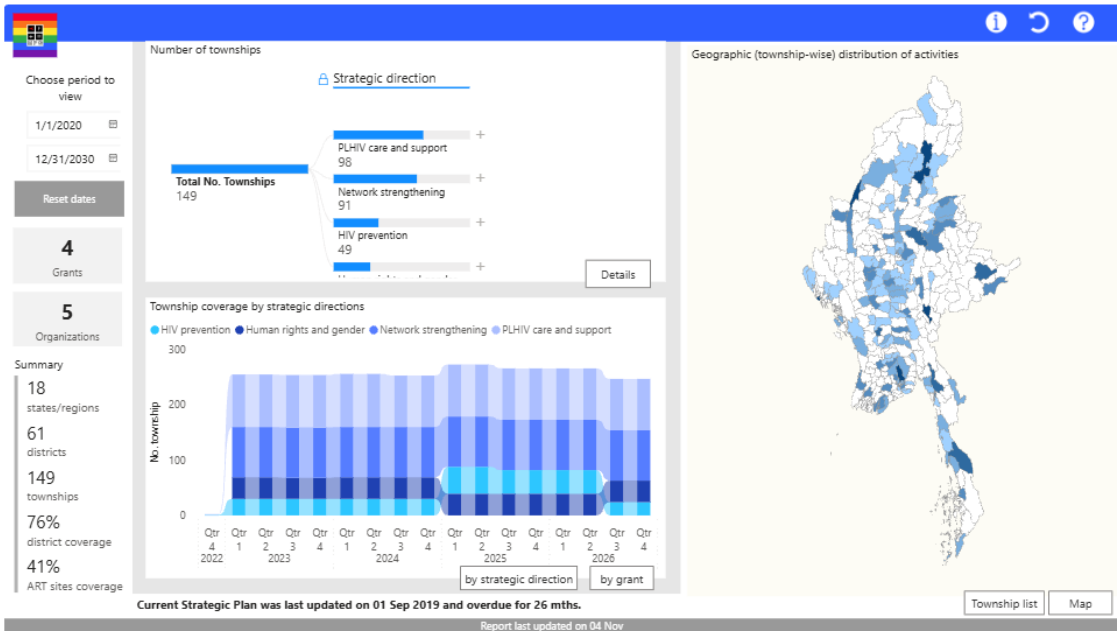

In this grant management dashboard, data insights are generated through the following types of analysis.

Type	Purpose	Example data products
Coverage	To assess program coverage	• Geographic (township-level) distribution of activities or program coverage • List of regions and townships where activities are implemented
Summary	To review overall figure	• Overall and region-level achievements and key indicators
Progress	To track progress against target	• Achievements against targets and changes in the most recent reporting quarter
Trend	To monitor changes overtime	• Trends in targets and achievements across the implementation period
Contributions	To compare disaggregated results	• Achievements disaggregated by sex, age group, or key population
Analysis	To examine relationship between variables	• Relationships between program inputs and outputs (e.g. KPs reached vs. HIV confirmations, counsellors trained vs. counselling sessions), shown using scatter plots, trend lines, and ratio lines

1. Overview page

Purpose

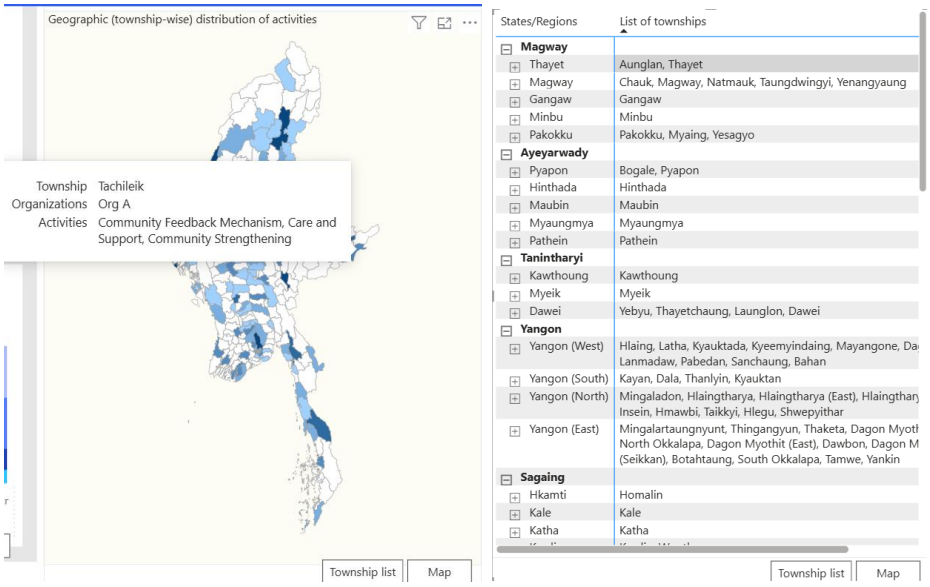

The purpose is to provide a high-level view of grants received, implementation townships and implementing activities by aligning with GRANT A's strategic directions.

Insights

Coverage

- Identify and locate townships covered by specific organizations or activities

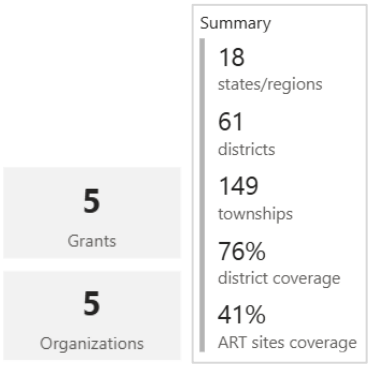

Map: Geographic (township-wise) distribution of activities or program coverage.

- Darker areas represent more activities being implemented
- Hover over a township to view details

Matrix: List of townships in each region and district, disaggregated by organization

Summary

- Review overall program coverage and the update status of GRANT A's Strategic Plan

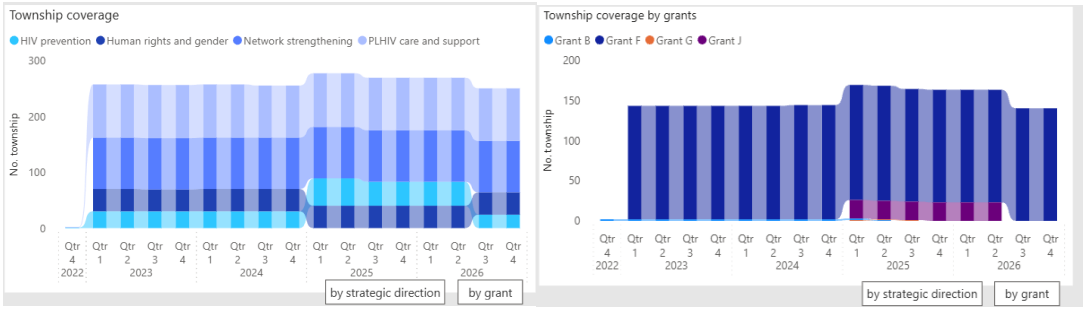

- **Cards and multi-row card:** Overall program coverage

Current Strategic Plan was last updated on 01 Sep 2019 and overdue for 15 mths.

- **Text box:** Updating status of current GRANT A's Strategic Plan document

Trend

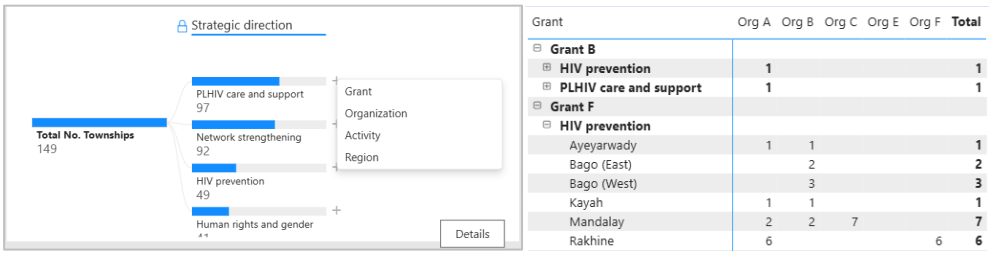

- Monitor township coverage across the time

Bar charts: Trend of township coverage, disaggregated by strategic direction or grant

Contribution

- Identify which strategic directions, grants, or activities contribute to township coverage

Grant	Org A	Org B	Org C	Org E	Org F	Total
Grant B						
HIV prevention	1					1
PLHIV care and support	1					1
Grant F						
HIV prevention						
Ayeyarwady	1	1				1
Bago (East)		2				2
Bago (West)		3				3
Kayah	1	1				1
Mandalay	2	2	7			7
Rakhine	6				6	6

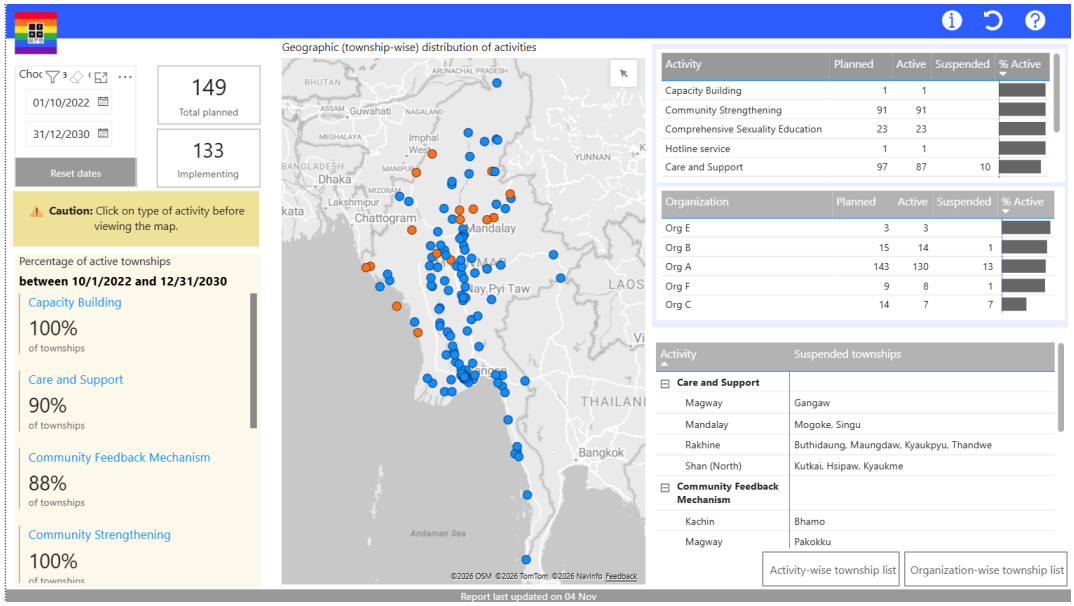

Decomposition tree: Number of townships where activities are being implemented, disaggregated by strategic direction, grant, organization, activity and region

Matrix: Number of townships by grant and activity, disaggregated by organization

2. Updates page

Purpose

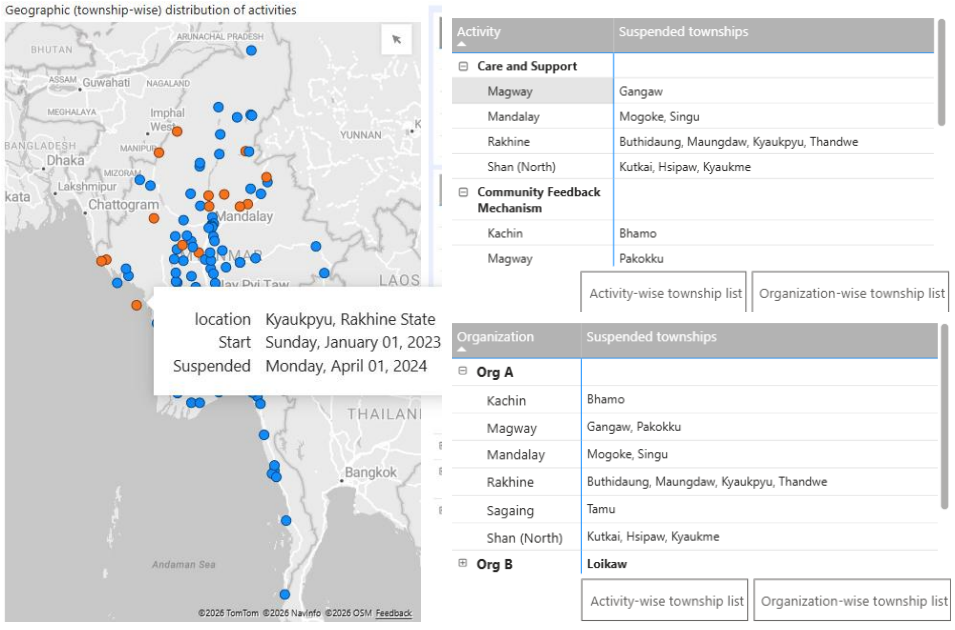

The purpose is to track the current implementation status and lists of townships where activities are being actively implemented.

Insights

Coverage

- Identify and locate townships where activities are being implemented as planned

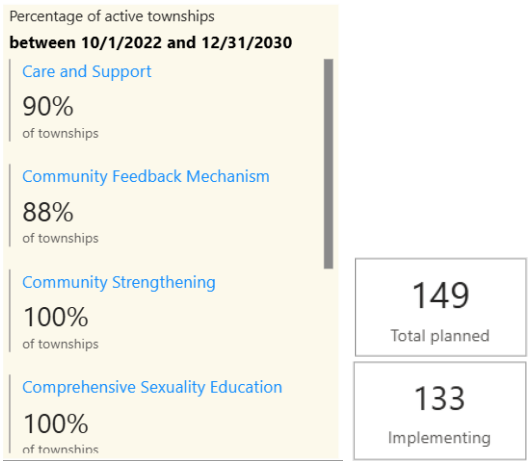

Map: Geographic (township-wise) distribution of activities or program coverage.

- Orange dots represent townships where activities are suspended, while blue dots represent townships with active implementation
- Hover over a township to view details

Matrix: List of suspended townships in each region, disaggregated by activity or organization

Summary

- Review overall implementation status by evaluating percentage of townships where activities are being actively implement as planned

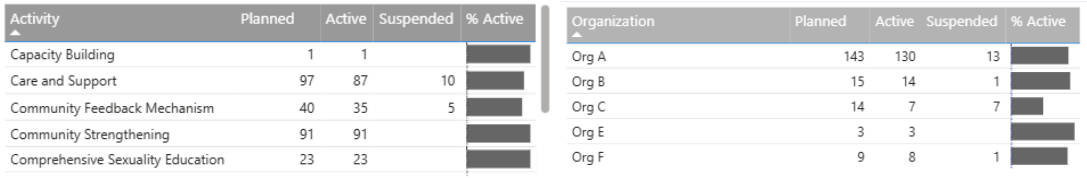

Multi-row card: Percentage of townships where activities are being implemented as planned

Cards: Total number of townships planned and active implementation

Contribution

- Compare percentage of active townships among different activities or organizations

Activity	Planned	Active	Suspended	% Active
Capacity Building	1	1		
Care and Support	97	87	10	
Community Feedback Mechanism	40	35	5	
Community Strengthening	91	91		
Comprehensive Sexuality Education	23	23		

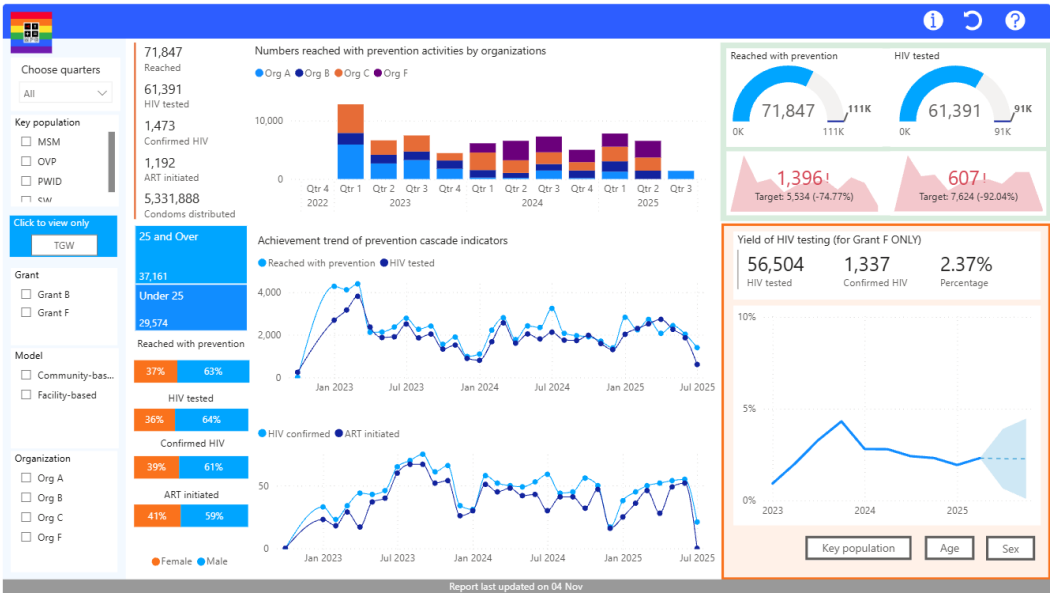

Organization	Planned	Active	Suspended	% Active
Org A	143	130	13	
Org B	15	14	1	
Org C	14	7	7	
Org E	3	3		
Org F	9	8	1	

Matrix: Number and percentage of townships with active implementation, disaggregated by activity and organization

3. Prevention page

Purpose

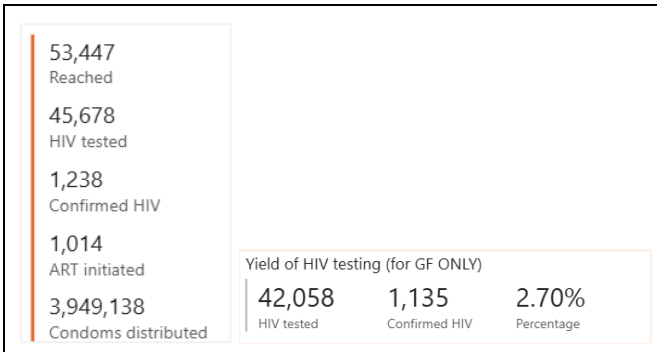

The purpose is to review the HIV prevention programs by evaluating KPIs related to activities that reduce the spread of HIV transmission.

Insights

Summary

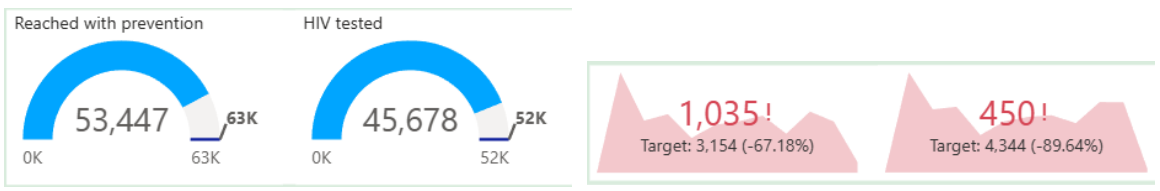

- Review overall achievements of HIV prevention activities

Multi-row cards: Overall achievements of prevention activities, including HIV yield

Progress

- Track achievements of HIV prevention activities against targets

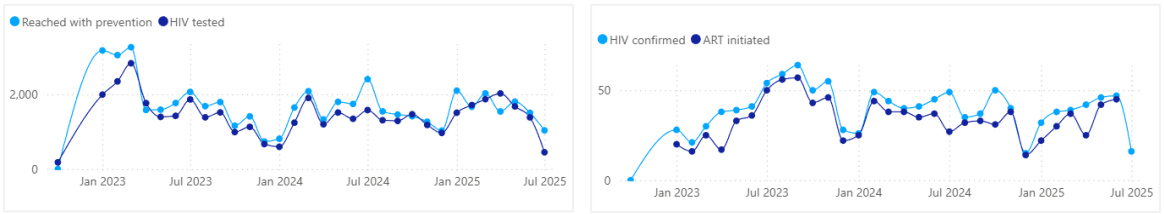

Gauges: Progress towards cumulative targets

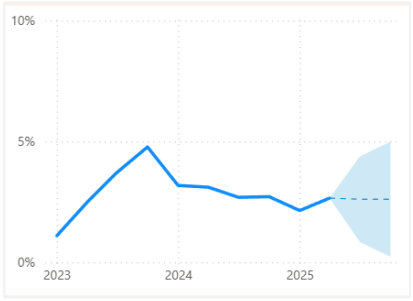

KPI cards: Progress toward targets at the most recent reporting period

Trend

- Monitor achievements of HIV prevention activities and HIV yield across the time

Line charts: Achievement trend of 4 cascade indicators; Reached, Tested, Confirmed and ART initiated

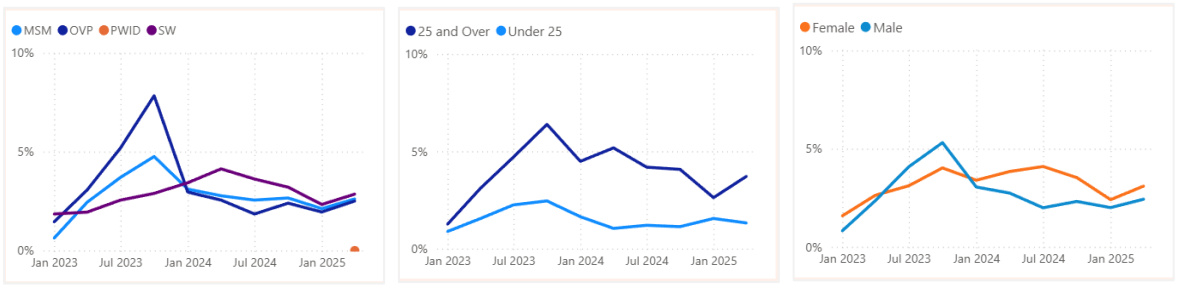

Line chart (with forecasting): Trend of HIV yield with projected forecasts for the next four quarters

Contributions

- Identify organizations with higher contribution to key population reached
- Age and sex disaggregation among key population reached
- Compare HIV yield among key populations, age groups and sex

Bar charts: Number reached with prevention programs, disaggregated by organization, age group and sex

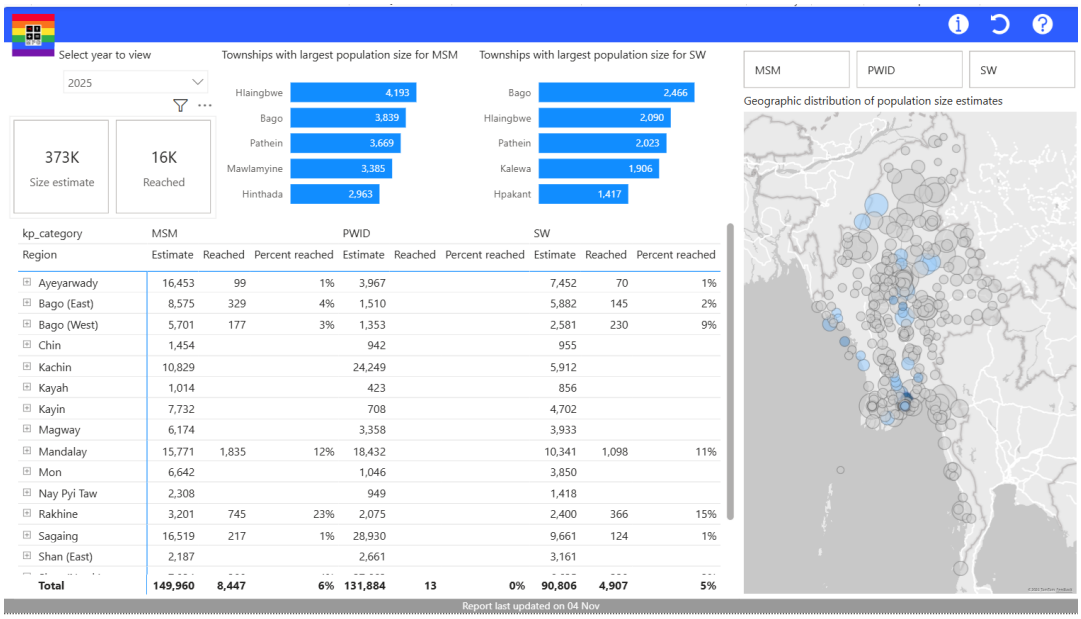

Line charts: Trends of HIV yield, disaggregated by key population, age group and sex

4. Population Size Estimation (PSE) page

Purpose

The purpose is to review the size estimate for different key populations using available data from NAP and UNAIDS.

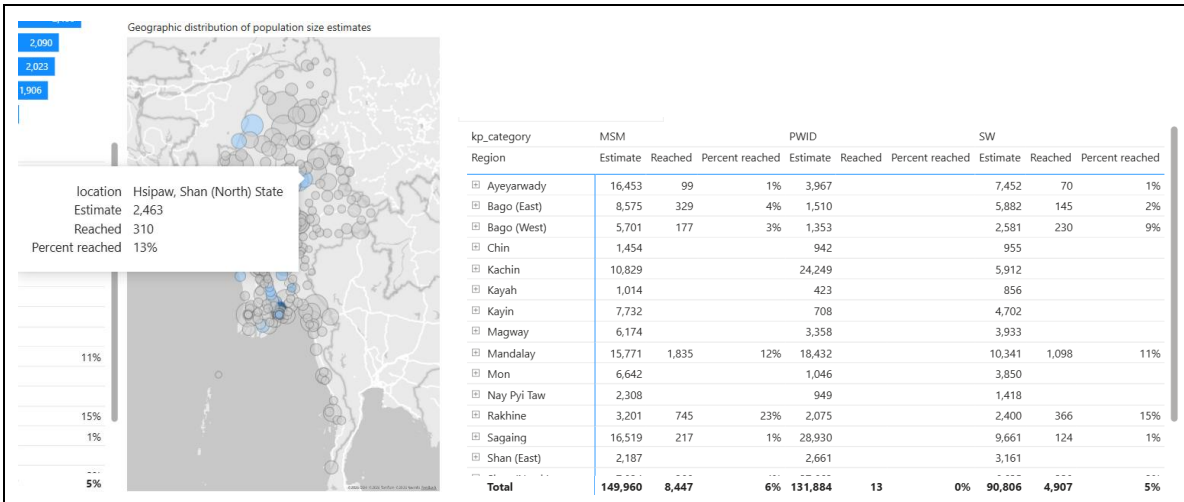

kp_category	MSM			PWID			SW		
Region	Estimate	Reached	Percent reached	Estimate	Reached	Percent reached	Estimate	Reached	Percent reached
Ayeyarwady	16,453	99	1%	3,967			7,452	70	1%
Bago (East)	8,575	329	4%	1,510			5,882	145	2%
Bago (West)	5,701	177	3%	1,353			2,581	230	9%
Chin	1,454			942			955		
Kachin	10,829			24,249			5,912

Map: Geographic (township-wise) distribution of population size estimates

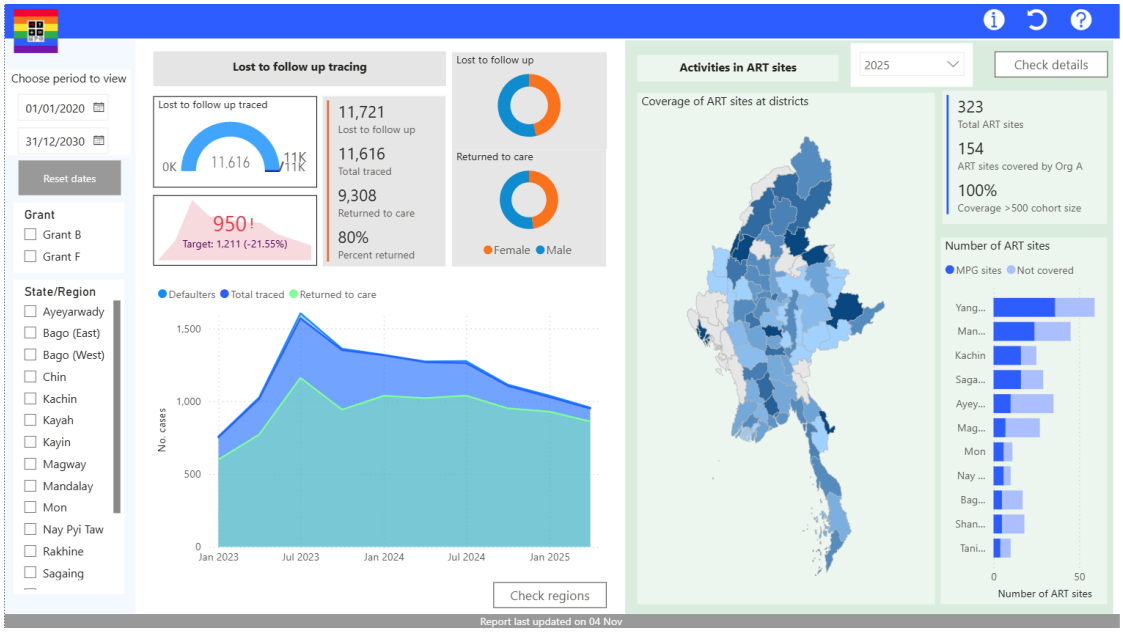

- Size of the bubble depends on population size. Grey dots are townships without GRANT A's activities, while blue dots with gradient colours represent percentage of KPs reached
- Hover over a township to view details

Matrix: List of townships, comparing population size estimates against KPs reached with prevention activities

5. Treatment support page

Purpose

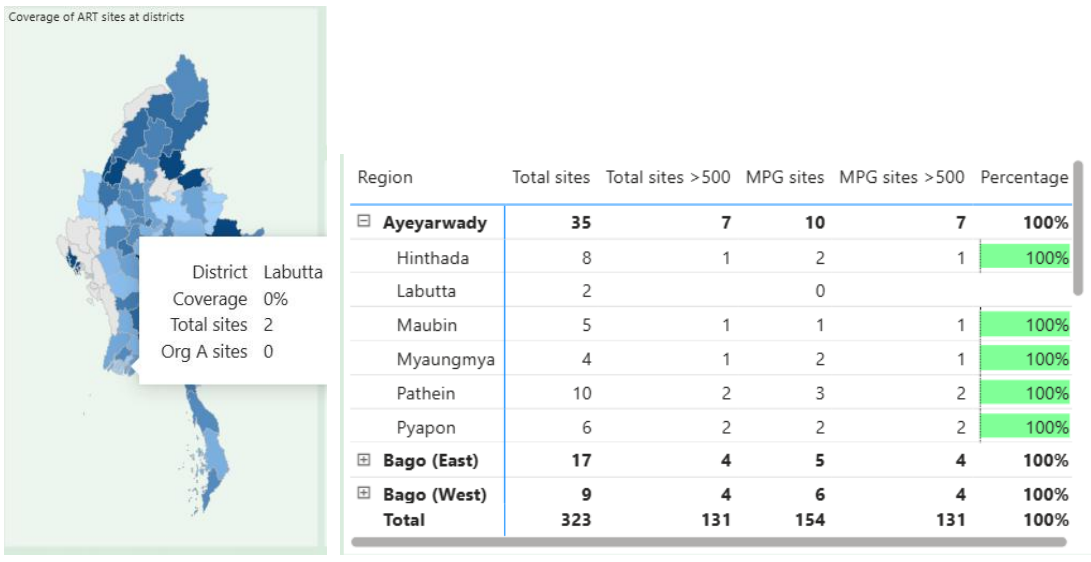

The purpose is to review lost to follow up tracing services and ART sites coverage of GRANT A by evaluating KPIs related to activities that improve the health and well-being of people living with HIV (PLHIV).

Insights

Coverage

- Identify and locate townships covered by GRANT A's care and support activities

Region	Total sites	Total sites >500	MPG sites	MPG sites >500	Percentage
Ayeyarwady	**35**	**7**	**10**	**7**	**100%**
Hinthada	8	1	2	1	100%
Labutta	2		0		
Maubin	5	1	1	1	100%
Myaungmya	4	1	2	1	100%
Pathein	10	2	3	2	100%
Pyapon	6	2	2	2	100%
Bago (East)	**17**	**4**	**5**	**4**	**100%**
Bago (West)	**9**	**4**	**6**	**4**	**100%**
Total	**323**	**131**	**154**	**131**	**100%**

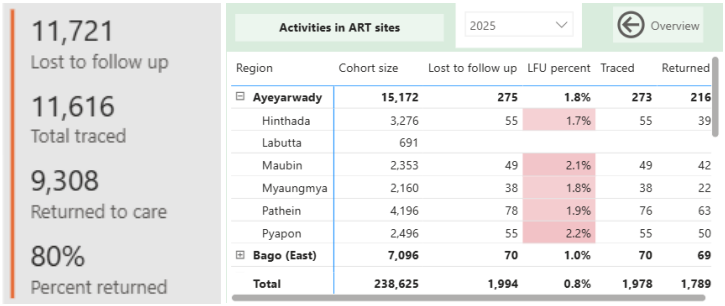

Map: Geographic (township-wise) distribution of NAP's ART sites and those covered by GRANT A

- Darker areas represent more ART sites
- Hover over a township to view details

Matrix: List of townships in each region and district with number of ART sites

Summary

- Review overall achievements of lost to follow up tracing activities

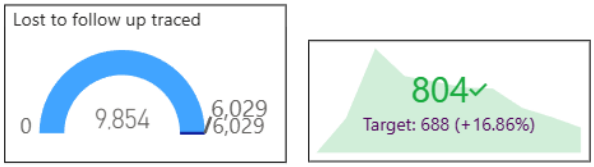

Region	Cohort size	Lost to follow up	LFU percent	Traced	Returned
Ayeyarwady	**15,172**	**275**	**1.8%**	**273**	**216**
Hinthada	3,276	55	1.7%	55	39
Labutta	691				
Maubin	2,353	49	2.1%	49	42

Matrices: KPIs for PLHIV care and support activities, disaggregated by region and township

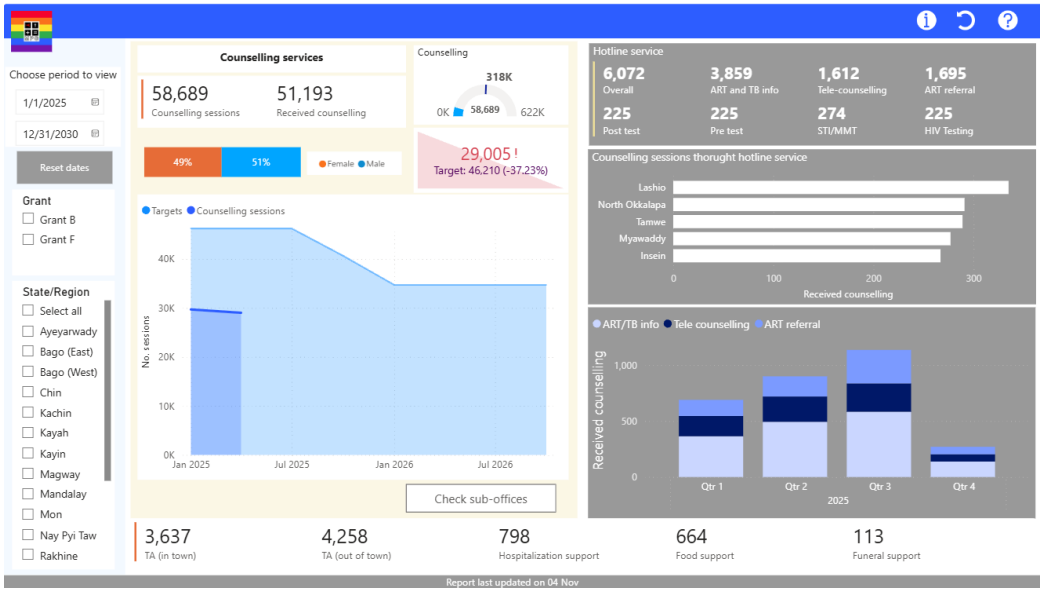

Donuts: Sex disaggregation of PLHIVs who lost to follow up and who returned to care

6. Counselling page

Purpose

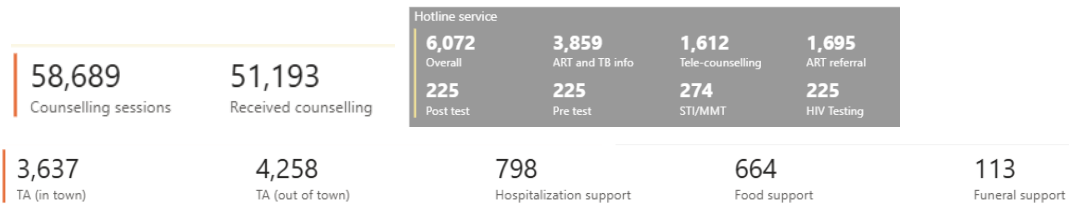

The purpose is to review counselling activities at GRANT A sites, hotline services and other PLHIV supports by evaluating KPIs related to activities that improve the health and well-being of PLHIVs.

Insights

Summary

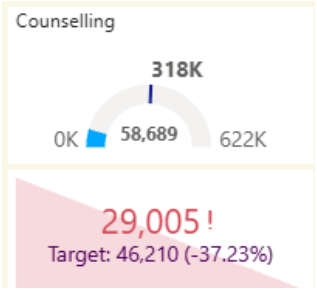

- Review overall achievements of counselling activities, focusing on counselling, hotline services and other patient support services

- **Multi-row cards:** Overall achievements of counselling, hotline and patient support services

Progress

- Track achievements of counselling activities against targets

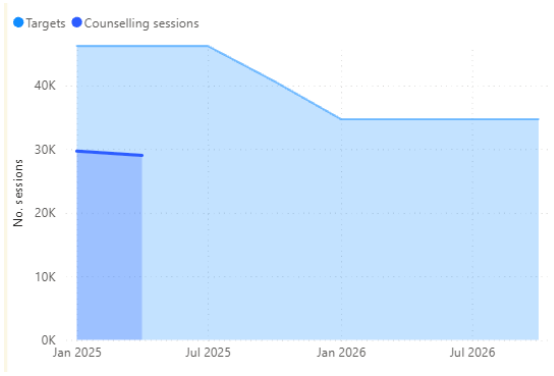

Gauges: Progress towards cumulative targets

KPI cards: Progress towards targets at the most recent reporting period

Trend

- Monitor targets and achievements of counselling activities

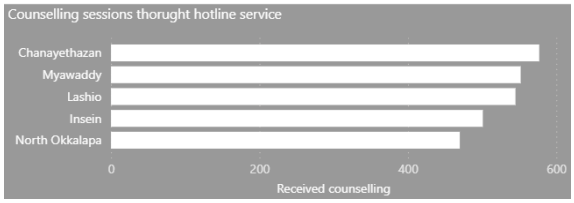

Line chart: Trend of targets and achievements for counselling activities

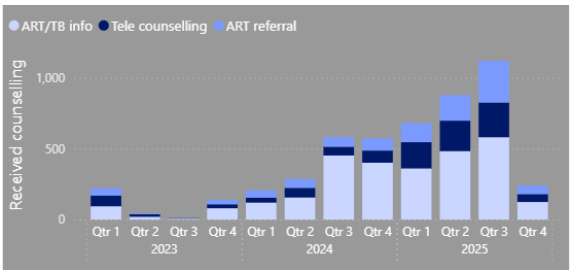

Contributions

- Identify activities with higher contribution to reported counselling sessions
- Identify top five contributing townships for hotline services, and compare the topics

Location	Counselling sessions	Sessions (last quarter)	Changes
Ayeyarwady	2,185	2,220	-35
Bago (East)	1,047	1,036	11
Bago (West)	1,410	1,432	-22
Chin	203	198	5
Kachin	2,692	4,183	-1,491
Kayah	126	107	19
Kayin	335	182	153
Magway	1,780	1,779	1
Mandalay	3,642	4,374	-732
Mon	1,102	971	131
Nay Pyi Taw	688	673	15
Total	**29,005**	**29,684**	**-679**

Matrix: Changes in achievements of counselling activities, disaggregated by region and township

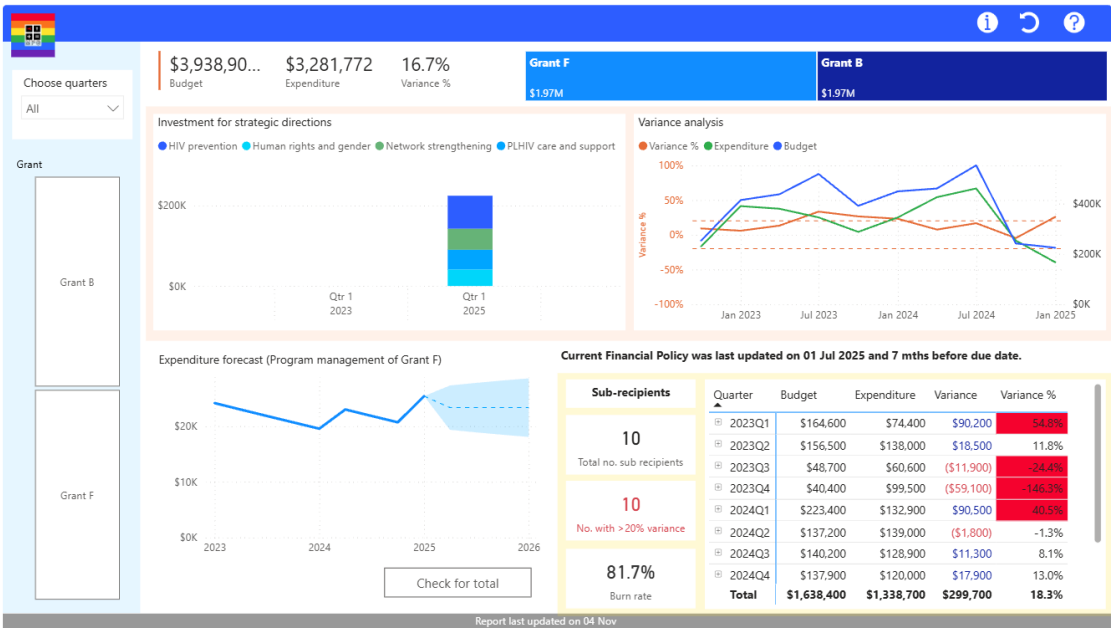

Bar charts: Top 5 contributing townships for hotline services. Number received hotline services, disaggregated by topic

7. Financial page

Purpose

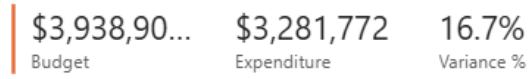

The purpose is to provide an overview of funds received and allocation across strategic directions, and to analyse expenditure trends, disbursements to sub-recipients, and budget variance.

Insights

Summary

- Review overall budget, expenditure, variance and update status of GRANT A's Financial Policy

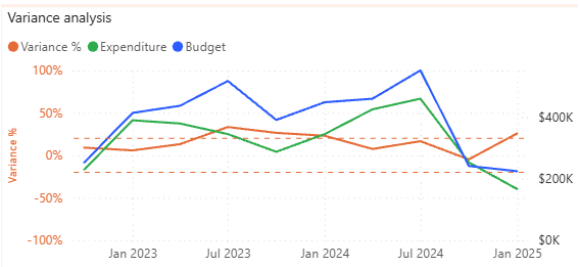

Current Financial Policy was last updated on 01 Jul 2025 and 18 mths before due date.

- **Multi-row cards:** Summary budget, expenditure and variance, and burn rate of sub-recipients
- **Text box:** Updating status of current GRANT A's Financial Policy document

Progress

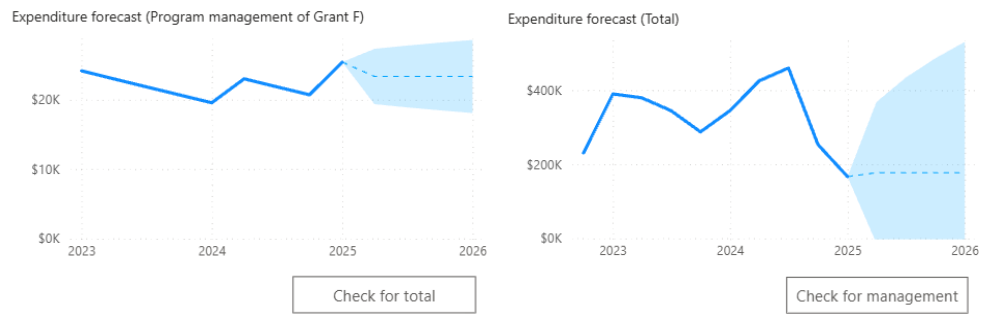

- Track budget, expenditure and variance to make sure that variance is within 20% threshold

Line charts: Changes in budget, expenditure and variance over time (dotted line – 20% threshold)

Trend

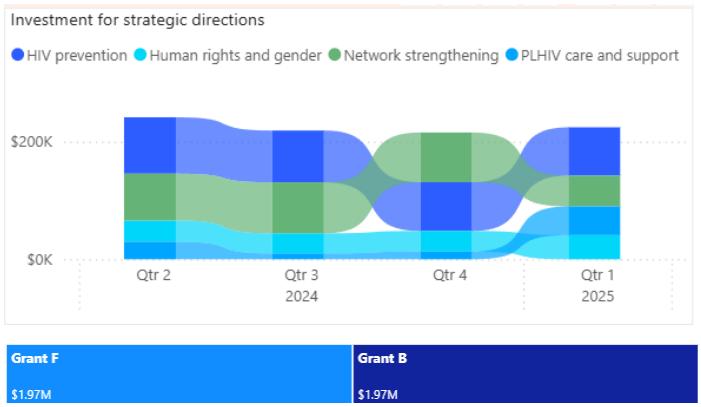

- Monitor overall expenditure and program management cost

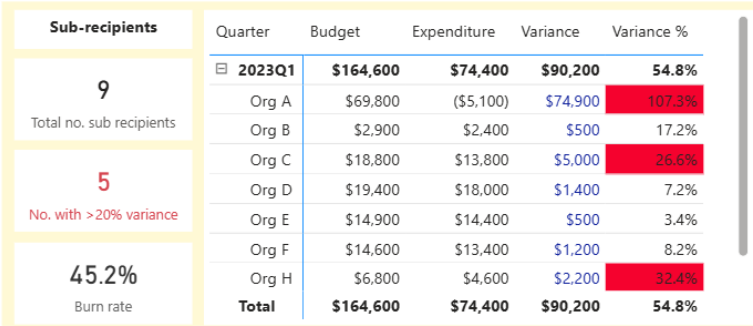

Line charts: Expenditure trend with projected forecasts for the next four quarters

Contributions

- Identify the strategic directions with higher budget allocation and contribution by different grants
- Compare sub-recipients regarding their budgets, expenditures and variances

Bar charts: Total budget, disaggregated by grant and investment to different strategic directions

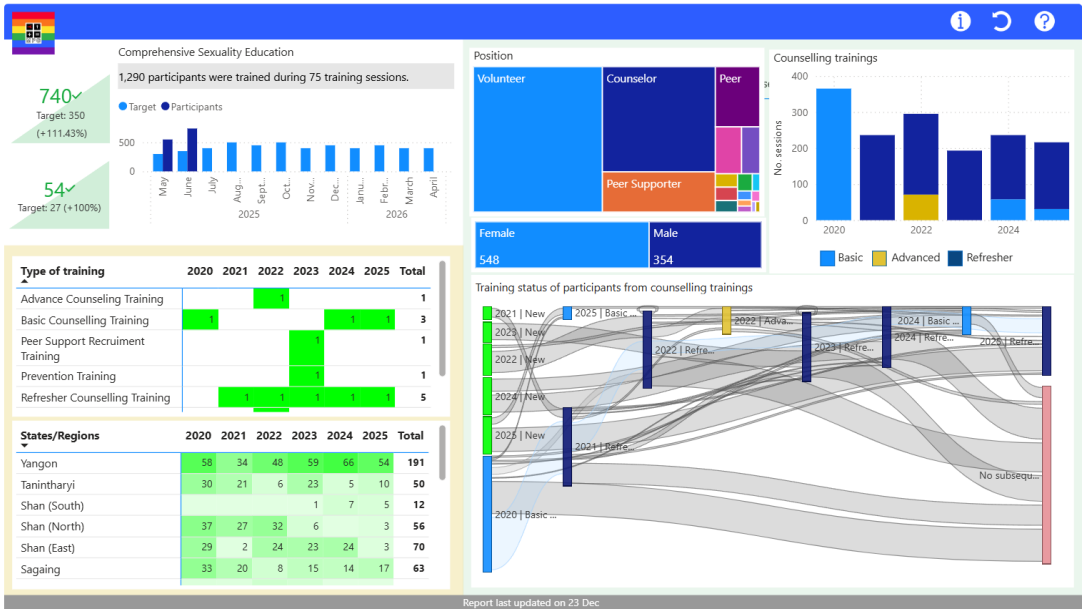

Sub-recipients				
9				
Total no. sub recipients				
5				
No. with >20% variance				
45.2%				
Burn rate				
Quarter	Budget	Expenditure	Variance	Variance %
⊟ 2023Q1	$164,600	$74,400	$90,200	54.8%
Org A	$69,800	($5,100)	$74,900	107.3%
Org B	$2,900	$2,400	$500	17.2%
Org C	$18,800	$13,800	$5,000	26.6%
Org D	$19,400	$18,000	$1,400	7.2%
Org E	$14,900	$14,400	$500	3.4%
Org F	$14,600	$13,400	$1,200	8.2%
Org H	$6,800	$4,600	$2,200	32.4%
Total	$164,600	$74,400	$90,200	54.8%

Matrix: Budget, expenditure and variance, disaggregated by sub-recipient

8. Training page

Purpose

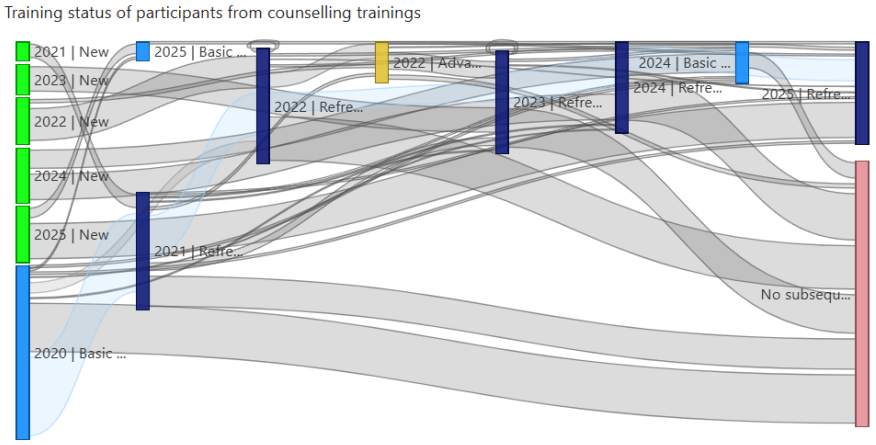

The purpose is to provide an overview of training for the critical workforce involved in HIV prevention, care, and support.

Insights

Summary

- Review the flow of participants across different counselling trainings over time

Sankey diagram: Individual participants receiving different counselling trainings at different periods

Progress

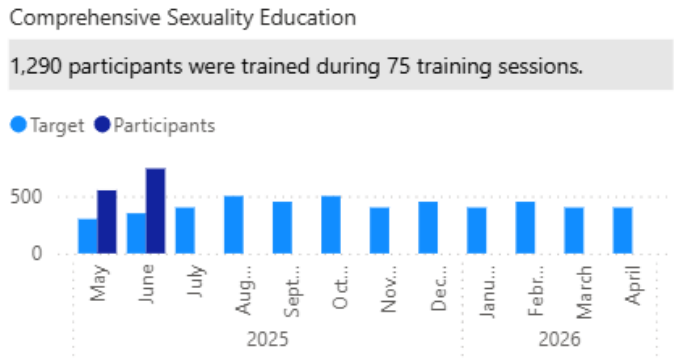

- Track achievements of CSE trainings against targets

KPI card: Progress towards targets at the most recent reporting period

Trend

- Monitor targets and achievements of CSE trainings

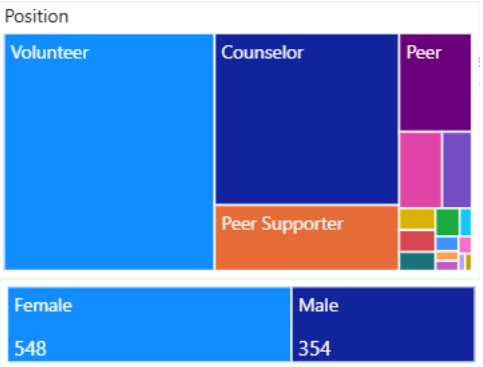

Bar chart: Trend of targets and achievements for CSE trainings

Contributions

- Identify the types of counselling trainings conducted and the contribution of different positions and sex among participants

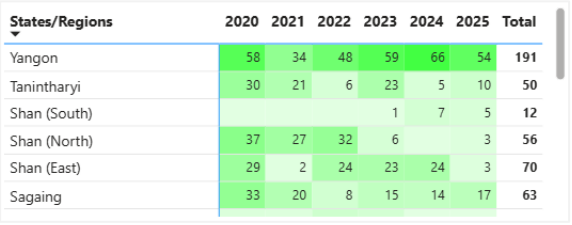

Bar charts: Number of training sessions provided over time, disaggregated by training type. Sex disaggregation of training participants

Tree map: Training participants, disaggregated by position

- Compare number of training sessions over time
- Compare number of training participants across regions

Type of training	2020	2021	2022	2023	2024	2025	Total
Advance Counseling Training			1				1
Basic Counselling Training	1				1	1	3
Peer Support Recruiment Training				1			1
Prevention Training				1			1
Refresher Counselling Training		1	1	1	1	1	5

States/Regions	2020	2021	2022	2023	2024	2025	Total
Yangon	58	34	48	59	66	54	191
Tanintharyi	30	21	6	23	5	10	50
Shan (South)				1	7	5	12
Shan (North)	37	27	32	6		3	56
Shan (East)	29	2	24	23	24	3	70
Sagaing	33	20	8	15	14	17	63

Matrices: Number of training sessions disaggregated by training type, and Number of participants, disaggregated by region

9. Community Feedback Mechanism (CFM) page

Purpose

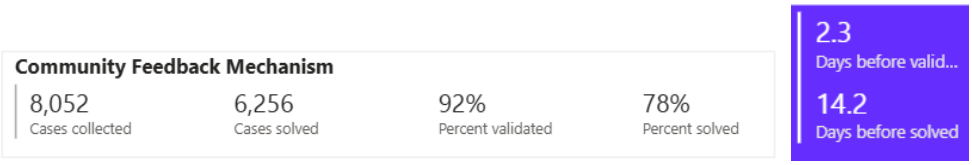

The purpose is to assess the performance of the community feedback mechanism (CFM) by evaluating progress against targets, achievement trends, geographic distribution and other key metrics.

Insights

Summary

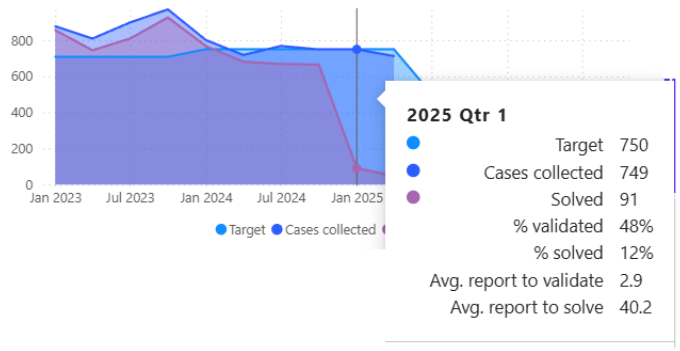

- Review overall achievement of CFM activities

- **Multi-row cards:** Overall achievements of CFM activities and key metrices

Trend

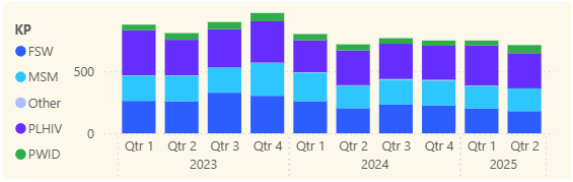

- Monitor targets and achievements of CFM activities

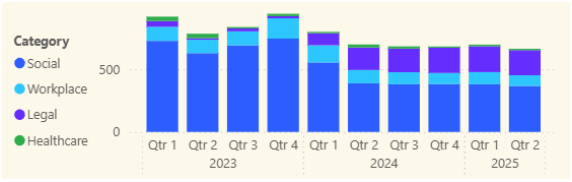

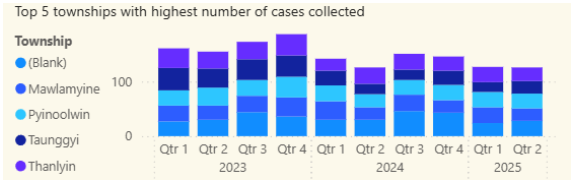

Line chart: Trend of targets and achievements for CFM activities

Contributions

- Identify key populations, CFM categories and townships with higher contribution to cases collected under CFM activities
- Compare achievements of CFM activities across regions and districts

Bar charts: Number of cases collected with MyRights application over time, disaggregated by key population, CFM category and township

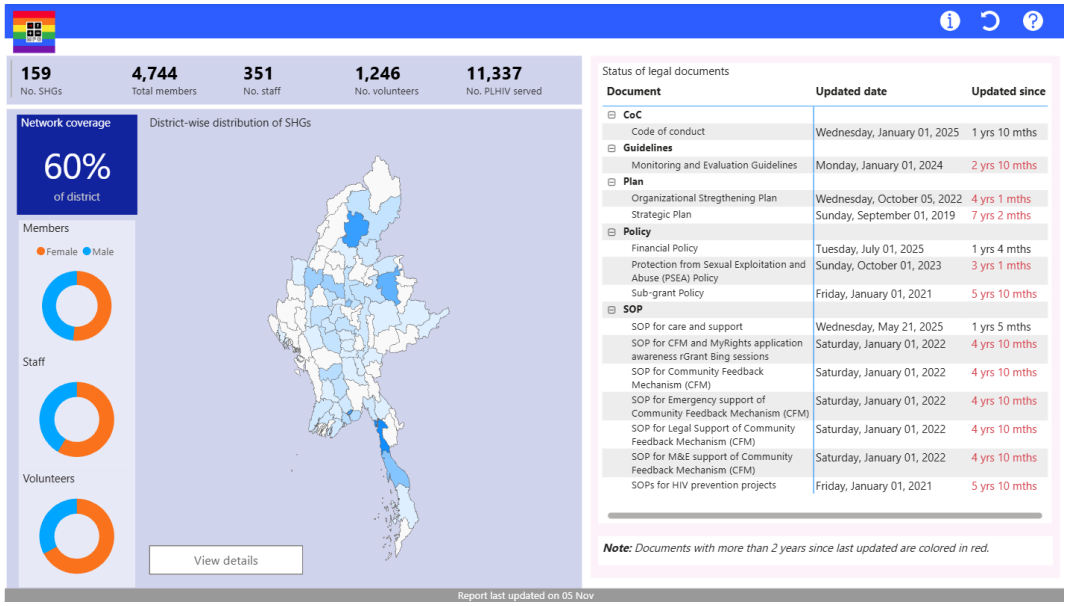

Region	Cases collected	Cases validated	Days (report to validate)	Cases solved	Days (report to solve)
Yangon	**994**	**915**	**2.3**	**761**	**14.0**
Yangon (East)	489	447	2.6	377	14.2
Yangon (South)	298	278	2.0	231	11.9
Yangon (North)	207	190	2.2	153	16.9
Ayeyarwady	**920**	**849**	**2.4**	**713**	**12.3**
Mandalay	**844**	**781**	**2.2**	**668**	**13.7**
Tanintharyi	**705**	**654**	**2.8**	**543**	**14.2**
Sagaing	**687**	**627**	**2.4**	**522**	**15.7**
Shan (North)	**461**	**436**	**2.2**	**381**	**15.3**
Kachin	**433**	**391**	**1.7**	**352**	**14.4**
Magway	**414**	**372**	**2.7**	**321**	**16.6**
Total	**8,052**	**7,370**	**2.3**	**6,256**	**14.2**

Matrices: Achievements of CFM activities, disaggregated by region and district

10. Governance page

Purpose

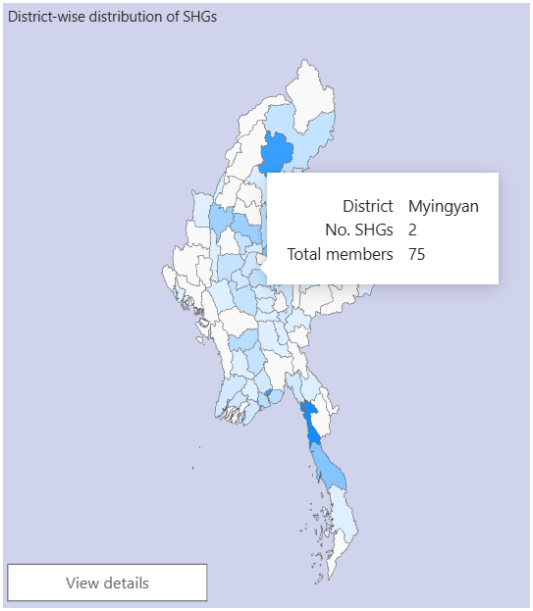

The purpose is to review GRANT A's network strengthening activities and status of governing legal documents.

Insights

Coverage

- Identify and locate townships covered by GRANT A's network of SHGs

Map: Geographic (district-wise) distribution of SHG groups and size estimates

- Darker areas represent more SHGs
- Hover over a district to view details

Summary

- Review the overall achievements of GRANT A's network strengthening activities

159	4,744	351	1,246	11,337	Network coverage

Donuts: Sex disaggregation of members, staff and volunteers at SHGs

11. Insights page

Purpose

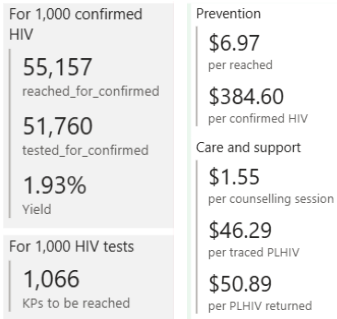

The purpose is to analyse program performance of HIV prevention and care and support activities and make comparison between project locations or models.

Insights

Summary

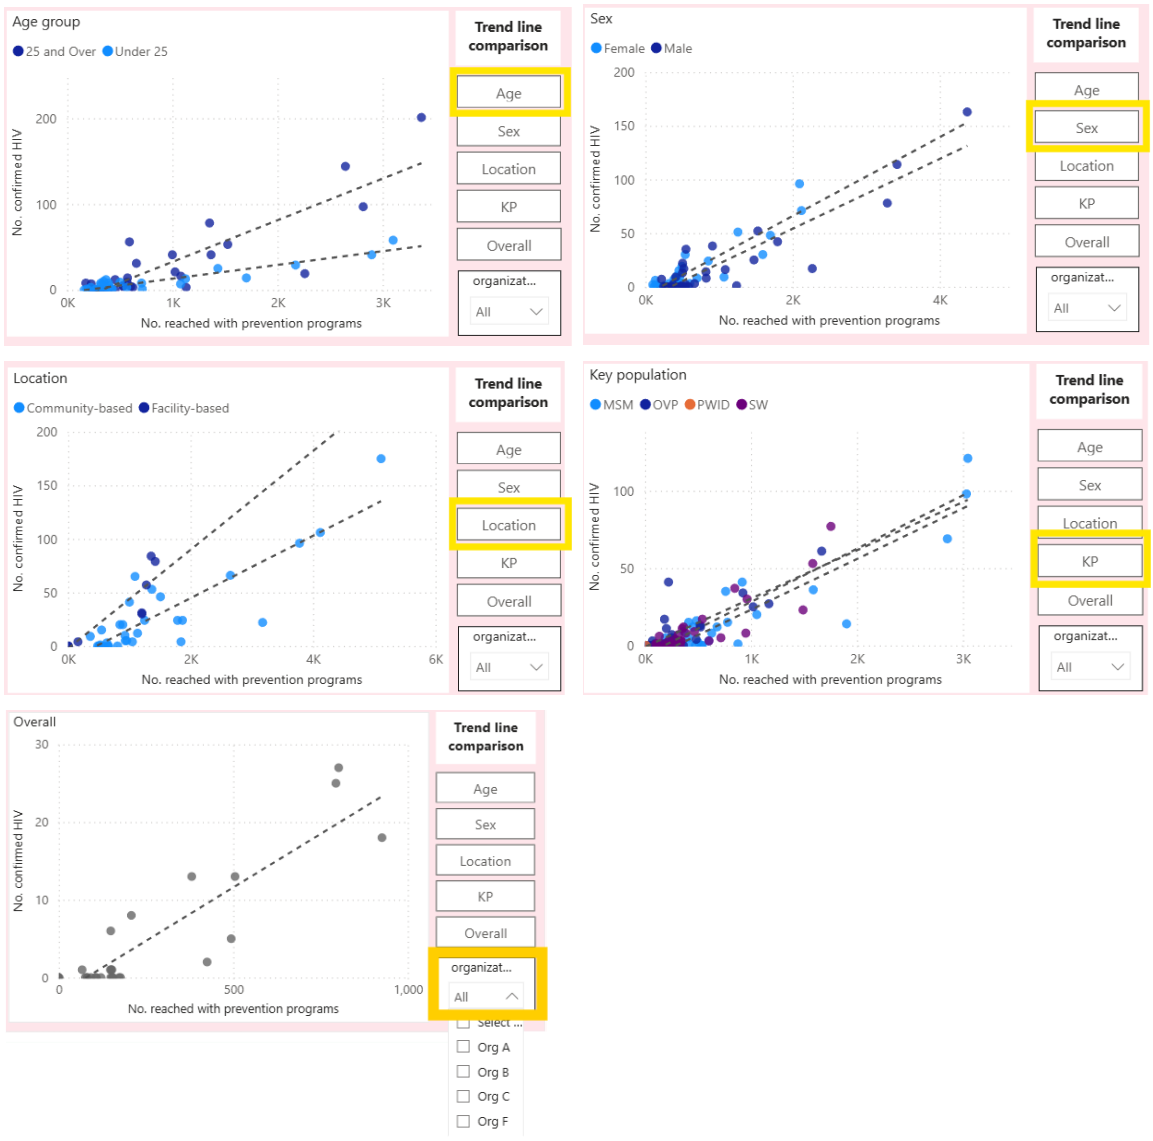

- Review overall program performance and financial efficiency metrics

Muti-row cards: Summary information about program and financial performance metrices

Contributions

- Compare relationship between number reached and confirmed HIV cases among different age groups, sex, models, key populations and organizations

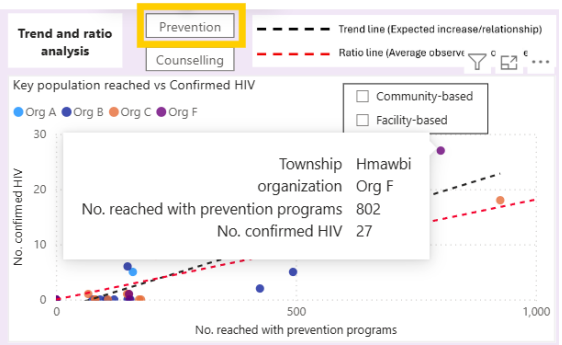

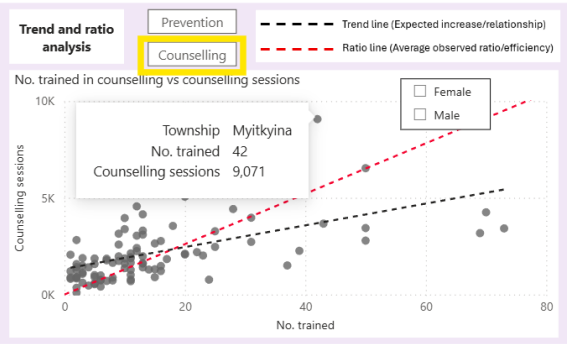

Scatter plots: Relationship between number reached and confirmed HIV cases, disaggregated by age group, sex, model, key population and organization

Analysis

- Examine the relationship between program inputs and outputs for prevention and counselling activities through a comparative analysis across townships, outreach modalities, etc.

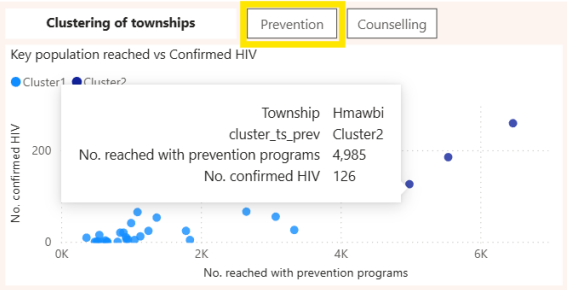

Scatter plots: Show relationships between **Number reached** and **confirmed HIV cases** (Prevention), and **Number of counsellors trained** and **counselling sessions conducted** (Counselling), across different outreach strategies and project locations

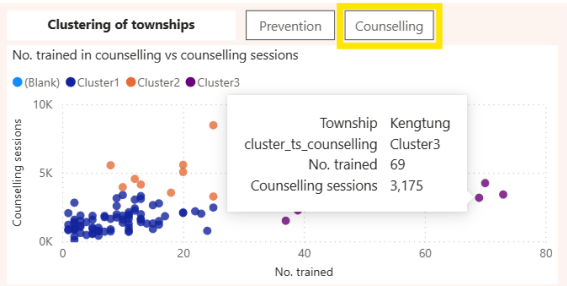

With Trend line and Ratio line:

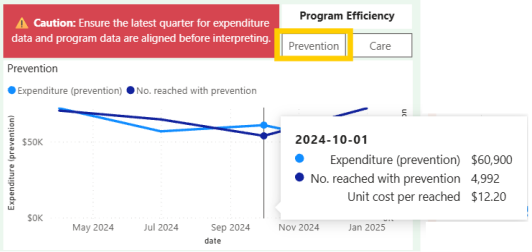

- **Trend line** represents the expected or overall relationship between inputs and outputs; a steeper slope indicates a stronger linkage and potentially higher program effectiveness.
- **Ratio line** represents the average observed efficiency across all data points. Data points falling below the ratio line indicate below-average performance and may require closer review to identify potential gaps or implementation challenges.

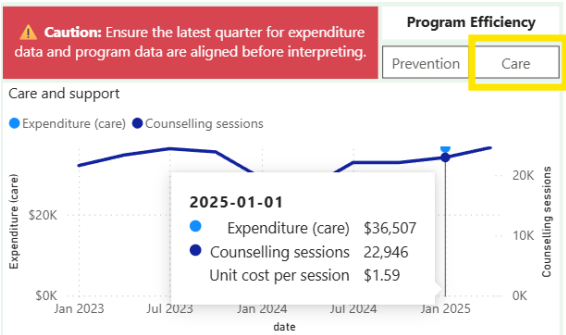

With Clustering: Townships with similar performance patterns are grouped into clusters to support targeted analysis. Clusters with high input levels but relatively low outputs may signal inefficiencies and warrant further investigation.

- Examine the program efficiency for prevention and care and support activities

Line charts: Trend of program efficiency, **Cost per KP reached** (Prevention) and **Cost per counselling session** (Care and Support)

Chapter 3: Maintenance Guide

This chapter is intended for focal persons and covers dashboard maintenance tasks, including data model structure, data refresh procedures, and updating visuals.

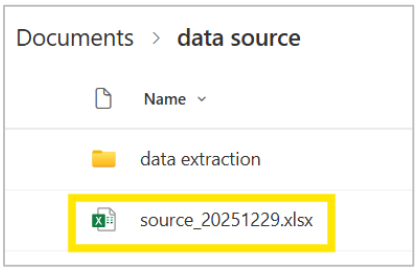

3.1 Workflow

An intermediary Excel workbook is used as a single data source to upload the information into the Power BI dashboard. Quarterly or at defined timepoints, the assigned staff will extract the required information from different data sources and enter the data in respective sheets of the data source.

To access the source Excel workbook with datasets in the organizations SharePoint folder,

Step 1: Go to SharePoint site (https://organizationA.sharepoint.com/sites/gmd/)

Step 2: Locate and open the Excel workbook

3.2 Data source

There are four categories of datasets, identified with tab colours in source Excel workbook, that feed into the report.

- Information requiring routine (quarterly) updates (dimension tables)
- Information requiring less frequent updates (fact tables)
- Information requiring less frequent updates (dimension tables)
- Reference information that typically does not require updating

Note: Each dataset is maintained in Excel as a named table and is connected to Power BI as a table. When new data becomes available, update the dataset by adding new rows to the existing table. Do not rename tables, as changing table names will break the connection.

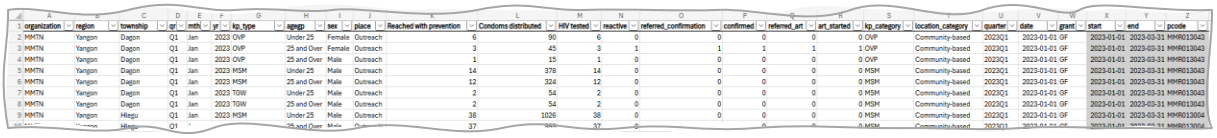

Data extraction

Information requiring routine (quarterly) updates

HIV prevention program dataset

Sheet	Content	Details	Updating
Prevention	Quarterly achievements of prevention activities, covering indicators: (1) KPs reached with prevention (2) KPs tested for HIV (3) KPs with reactive HIV result (4) KPs referred for confirmation (5) KPs with confirmed HIV result (6) PLHIVs referred for ART (7) PLHIVs initiated with ART (8) Condom distributed	Grant Organization Township Age group Sex Place/model KP type	**Source** - Prevention database **Extraction** - Quarterly

2024Q1			Mawlamyine
2024Q2			Monywa
2024Q3			Myitkyina
2024Q4			Pathein

Data connection

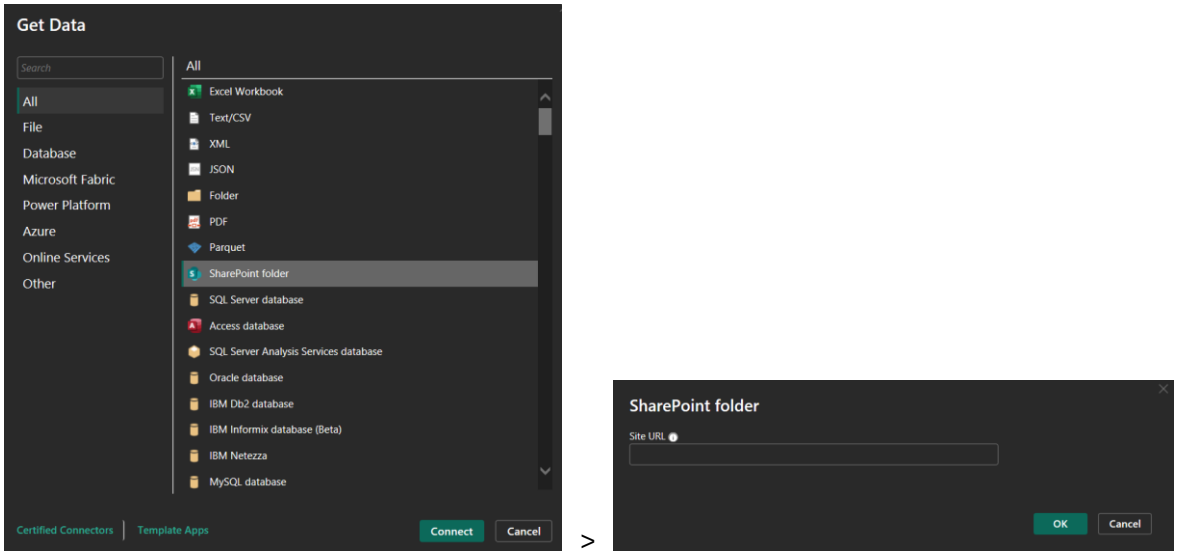

Step 1: Open Power BI Desktop

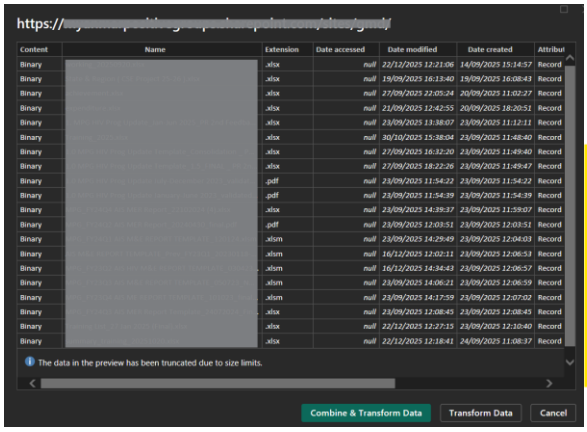

Step 2: Select **Home > Get data** to connect the source, an Excel workbook, which is stored in the organization's SharePoint folder.

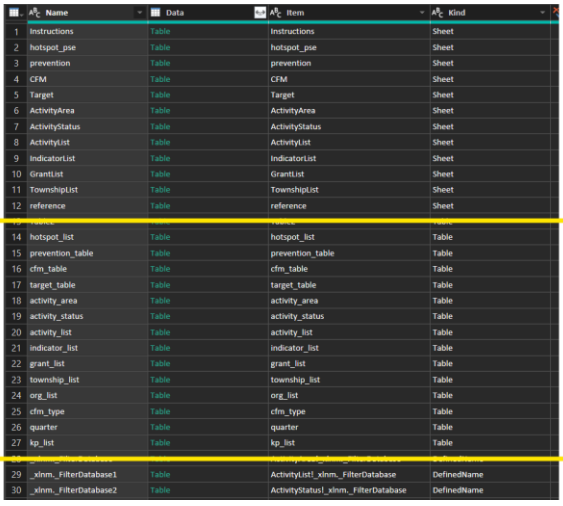

Step 3: Choose **SharePoint folder** and enter the URL into the box. Then, connect the folder using the credentials of organization account.

Step 4: After the connection is established, the contents of the SharePoint folder will appear. Select the required table (not the worksheet) to load the dataset into Power BI.

Data transformation

After loading the data, use Power Query (**Home > Transform data**) to perform basic data cleaning steps such as removing unnecessary columns and setting correct data types. Power BI Desktop is then used to transform the data, create measures, build the data model, and create visuals.

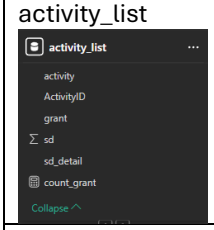

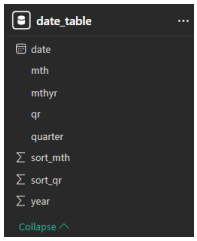

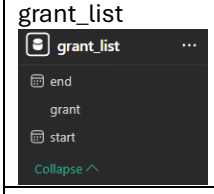

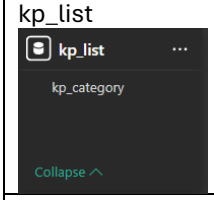

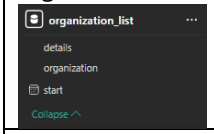

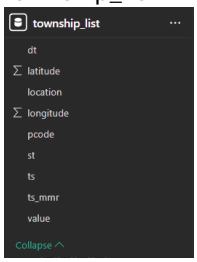

3.3 Data modelling

Tables

Tables in the model contain two types of elements: columns and measures.

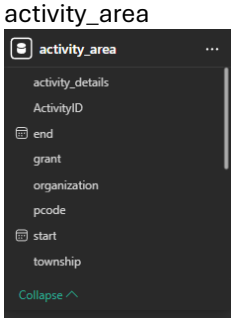

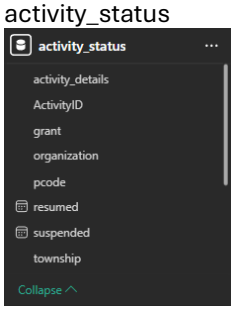

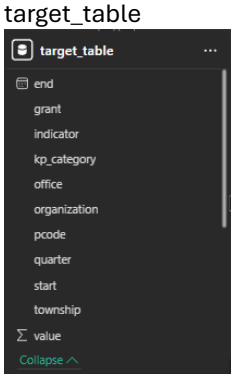

- Columns are values from the source datasets. They are used in relationships and are affected by slicers and filters.
- Measures, identified by calculator icons, are dynamic calculations evaluated when a report is viewed. Measures are not physically stored in the tables.

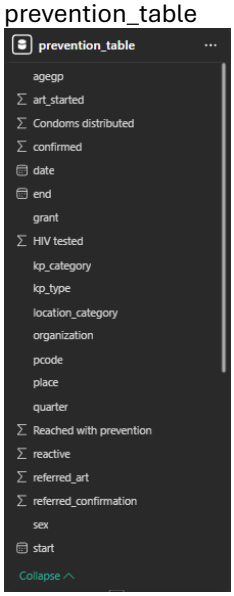

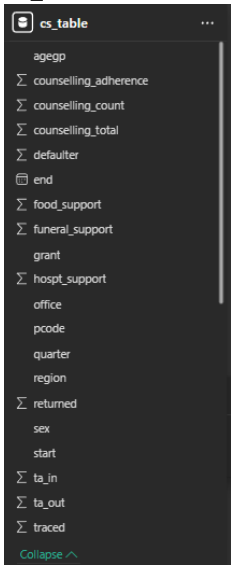

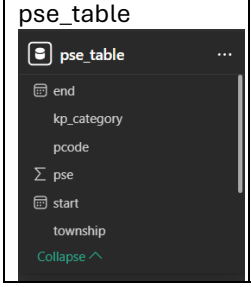

Dimension tables

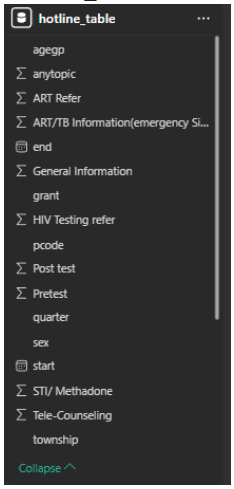

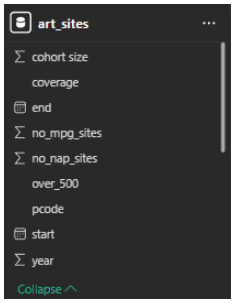

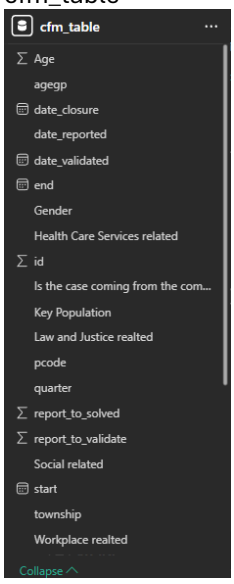

Table	Columns	Measures	Connected table (sheet)
activity_list 	• activity • ActivityID • grant • sd • sd_detail	• count_grant	• activity_list (ActivityList)
date_table 	• date • mth • mthyr • qr • quarter • sort_mth • sort_qr • year	• NA	• No connected table. Created with DAX.

Data relationship

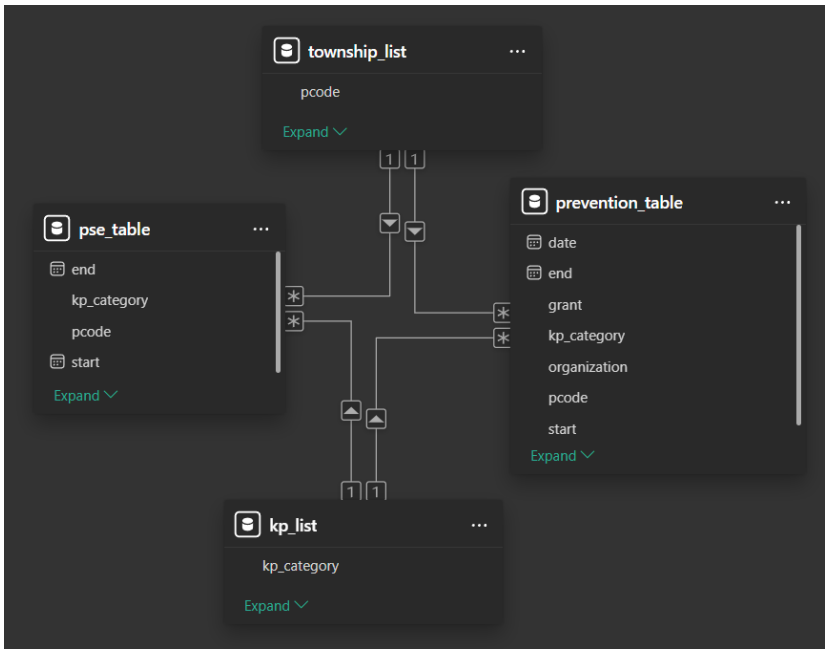

The data model uses a star schema with multiple fact tables. Most relationships are configured as one-to-many with single-direction filtering from dimension (lookup) tables to fact (transaction) tables. For the Care and Support and Training datasets, many-to-many relationships are used where required. This overall structure improves performance and ensures consistent filtering across visuals.

Refer to following diagrams for data models used in different report pages

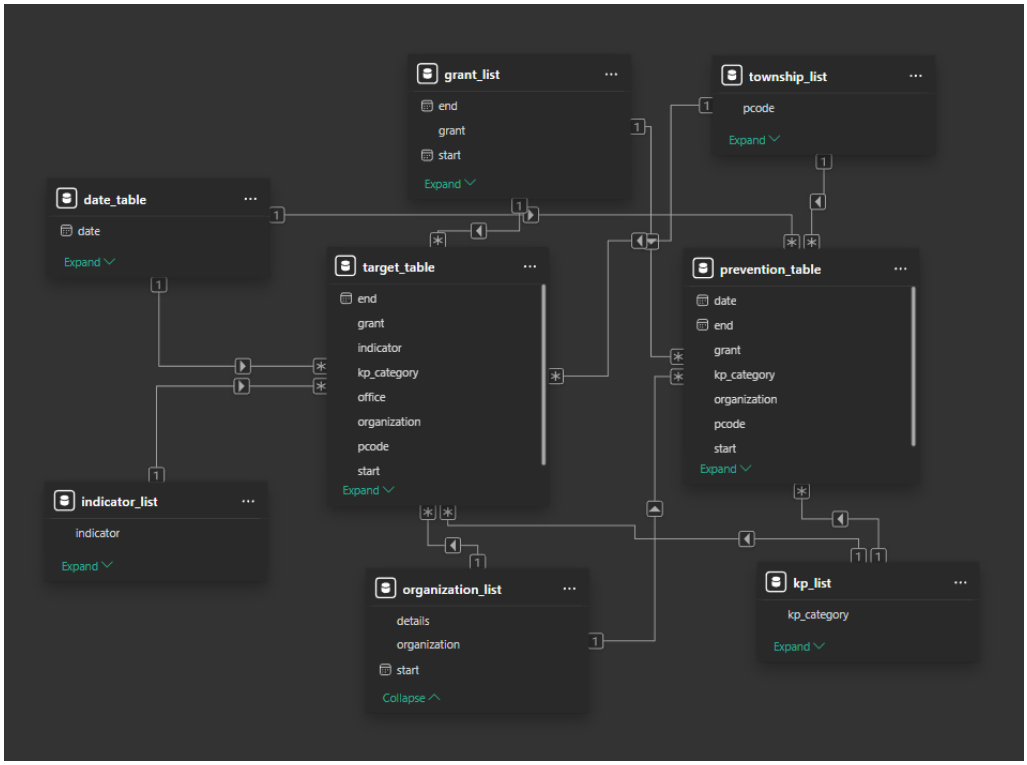

Overview page and Update page

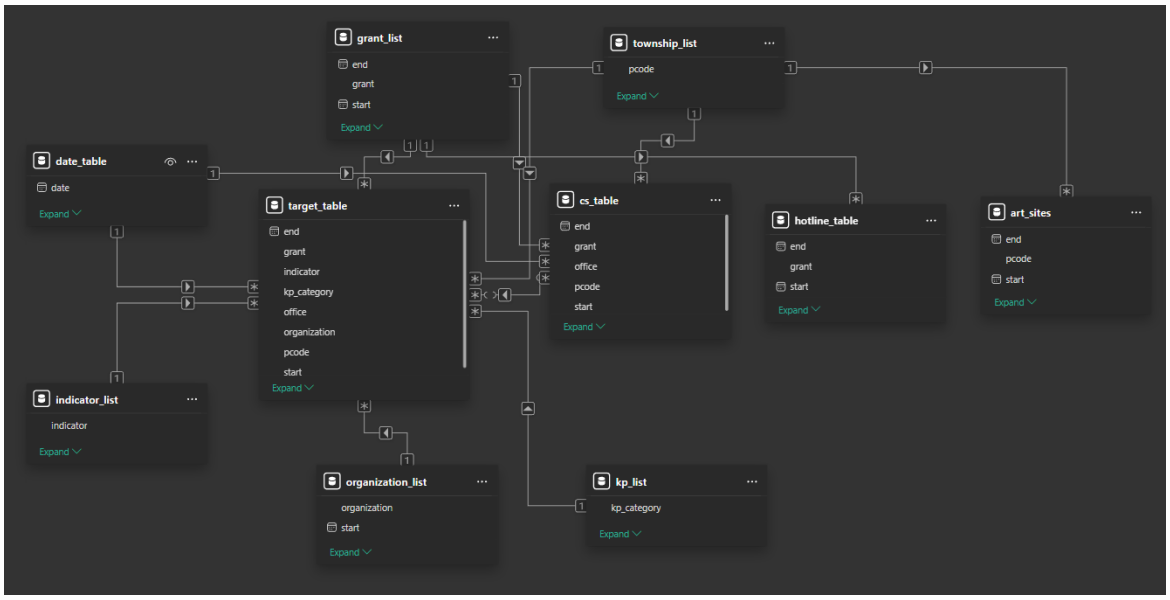

PSE page

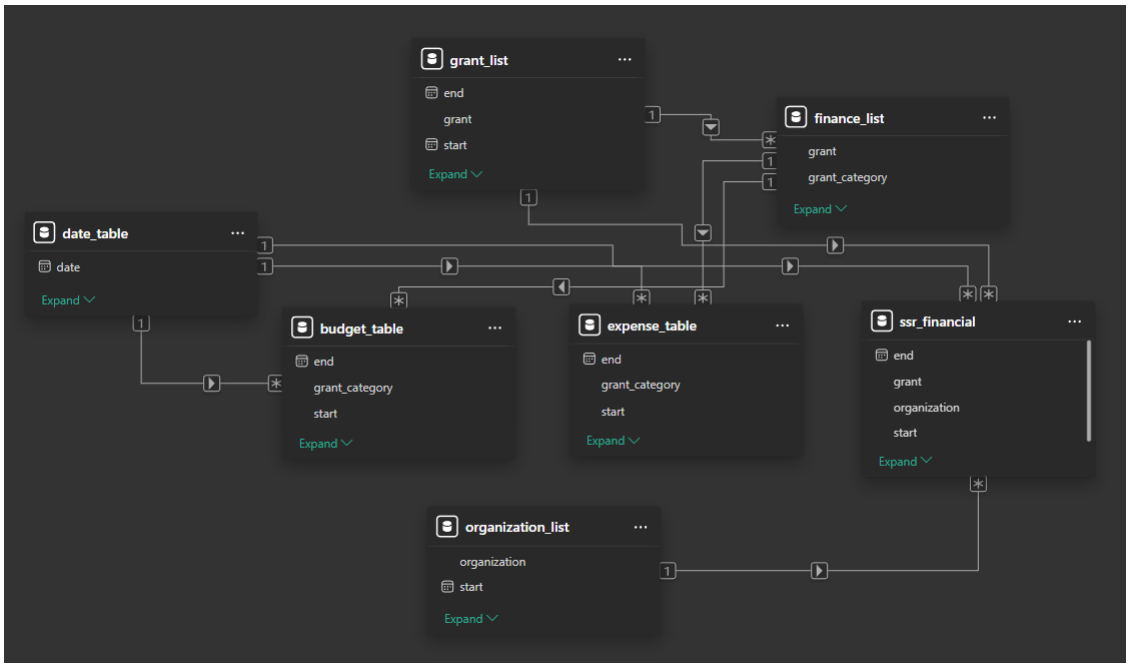

Prevention page

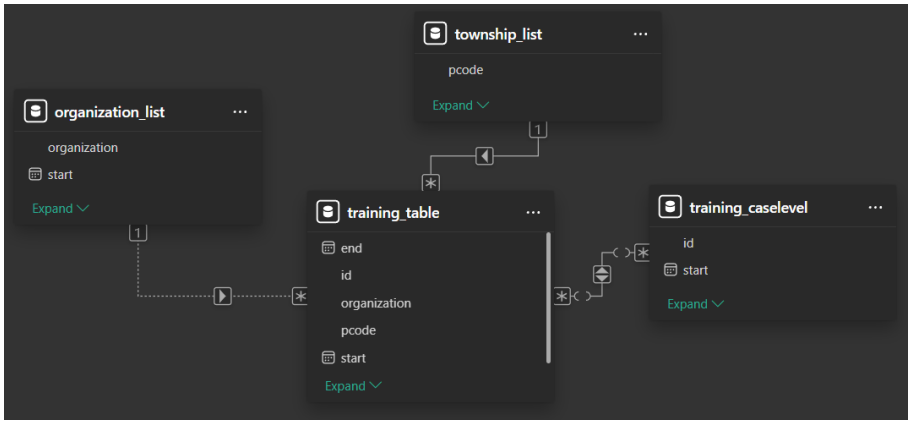

Treatment support page and Counselling page

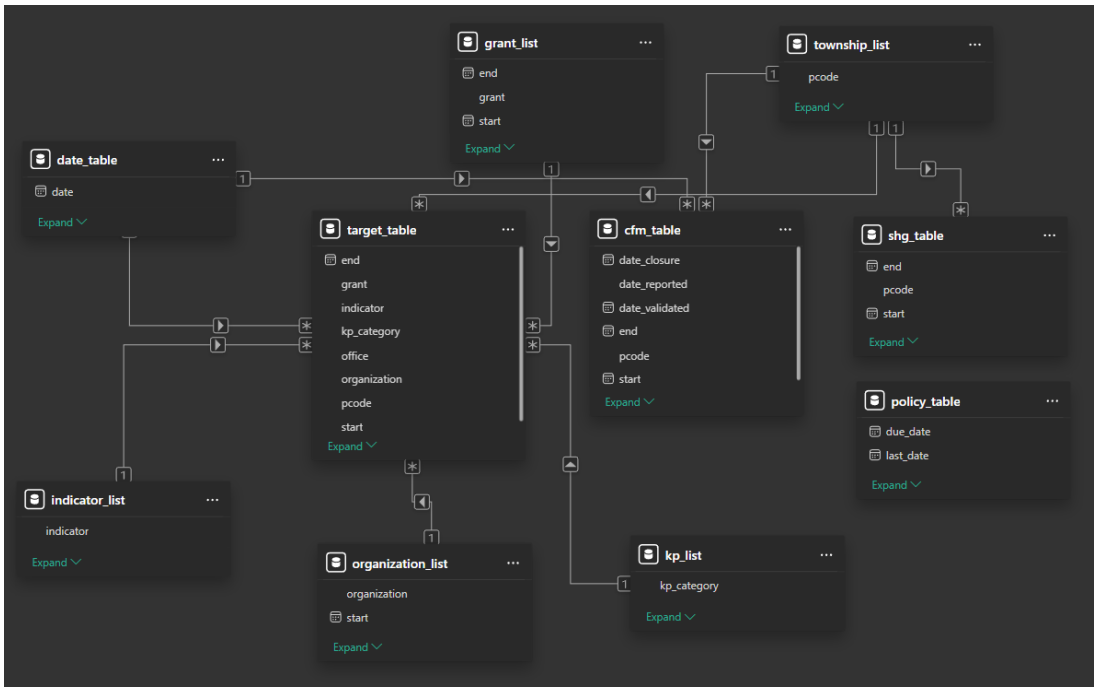

Financial page

Training page

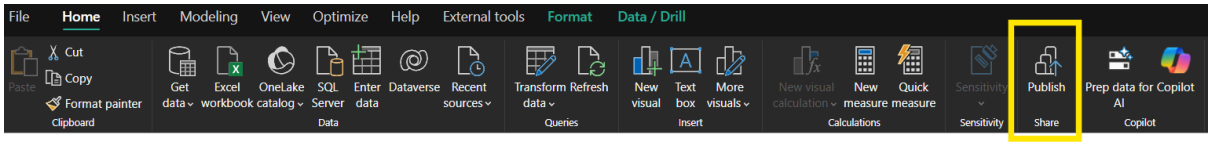

CFM page and Governance page

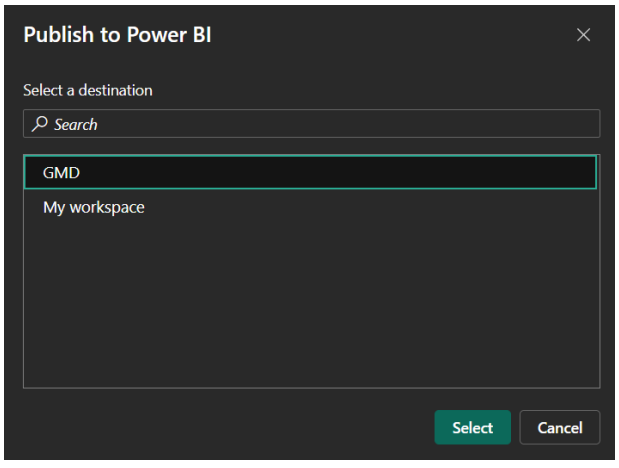

Data visualization and publishing the report

After building data model, data visualization is done by adding different types of visuals, adding data and formatting the visuals. Then the report is published to the Power BI service by following steps:

Step 1: Click on **Home > Publish**

Step 2: Select a workspace as destination and click on **Select** to publish

After publishing Power BI report, an APP is created in the Power BI service to share with wider audience.

3.4 Data sharing

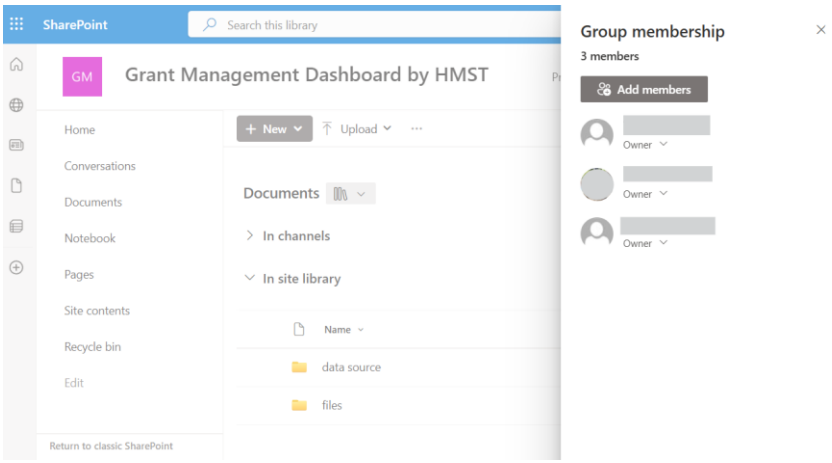

This dashboard contains health program data and financial information, which are considered sensitive. Access to the dashboard and related datasets is restricted to designated staff only.

Data security

SharePoint folder

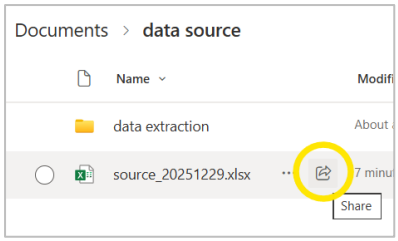

The source Excel workbook (datasets) and the Power BI file (.pbix) containing the data model are stored in the organization's SharePoint folder:

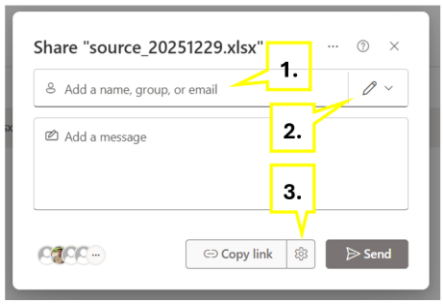

https://myanmarpositivegroups.sharepoint.com/sites/gmd/

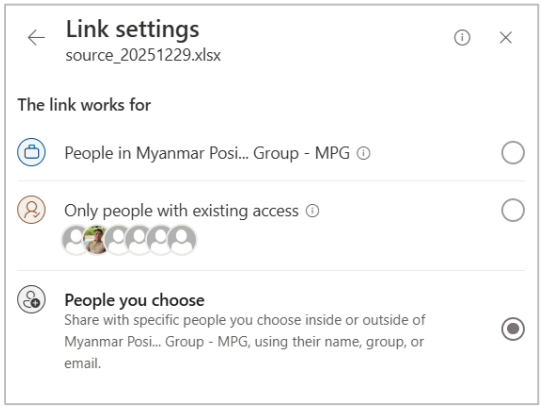

Access to this folder is limited to staff responsible for updating datasets or maintaining the Power BI file. Dashboard users do not need access to the SharePoint folder. If additional users need access to the SharePoint folder, follow the steps below:

Step 1: Click on **Share icon**, add person's name or email address, and then click **Link settings**

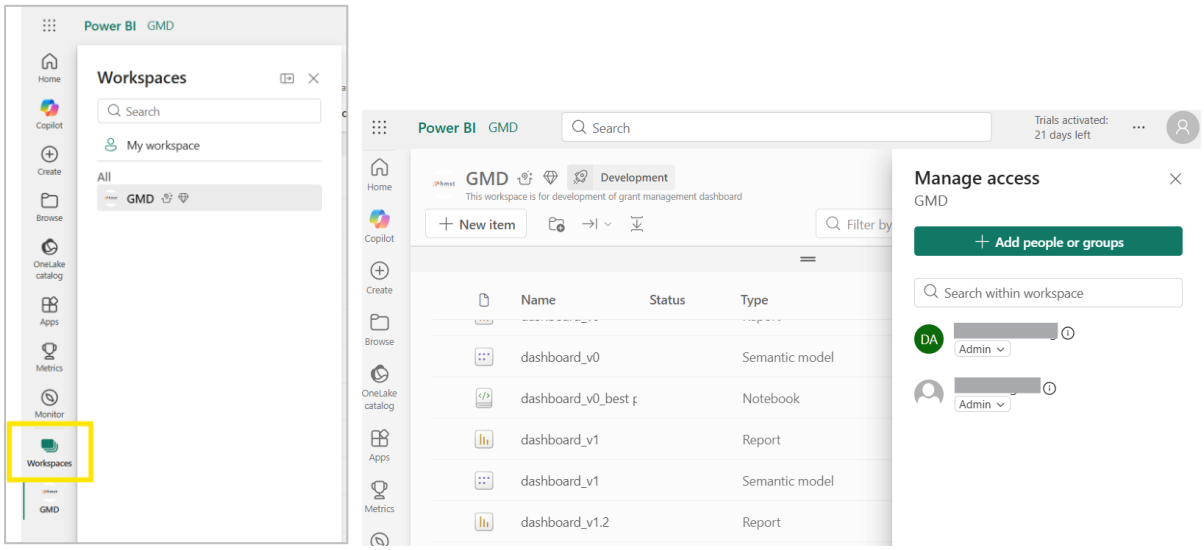

Step 2: Select **People you choose**, then click **Apply**

Power BI service (Workspace)

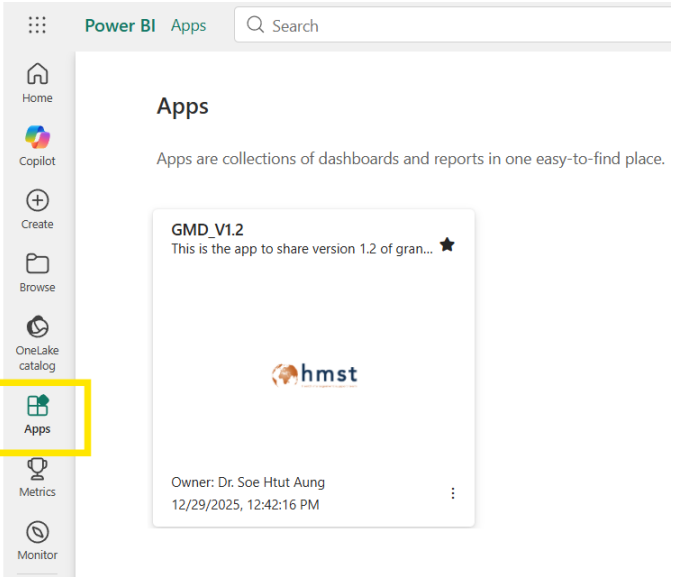

Published reports and semantic models are stored in a dedicated Workspace in the Power BI Service (https://app.powerbi.com/). The **GMD** workspace contains the current version of the Grant Management Dashboard. Within the workspace, selecting Manage access allows administrators to add or remove users and assign roles.

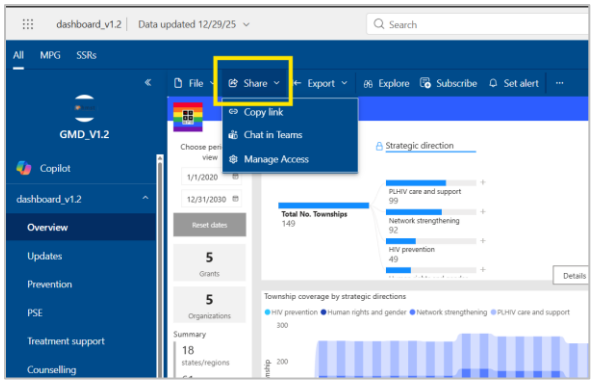

Currently, there are two dashboard creators as admin users, one from HMST and one from GRANT A. For dashboard maintenance, add additional people by assigning role as member or contributors directly to the workspace to have full access to reports and schematic models. It is not necessary to give access to dashboard users to the Power BI workspace.

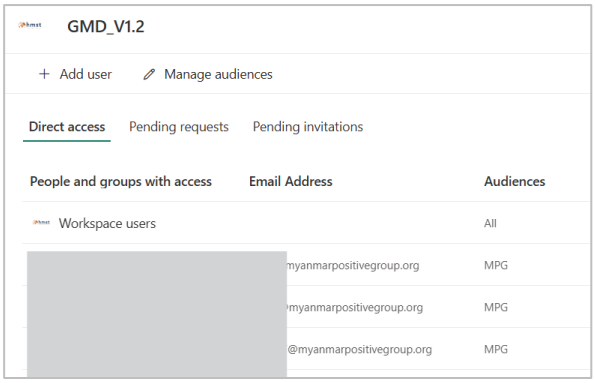

Power BI application (App)

The published dashboard is shared through a Power BI App, which can be accessed in the Power BI Service: https://app.powerbi.com/. Click on **GMD_V1.2** to open the app.

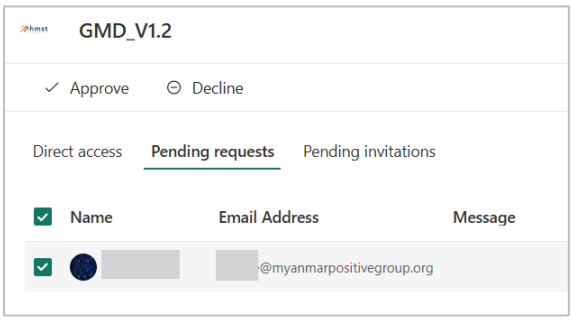

Clicking on **Share > Manage Access** will allow to invite access and approve pending request. The app is intended for dashboard users. Users who are already members of the Power BI workspace automatically have full access and do not need to be added to the app separately.

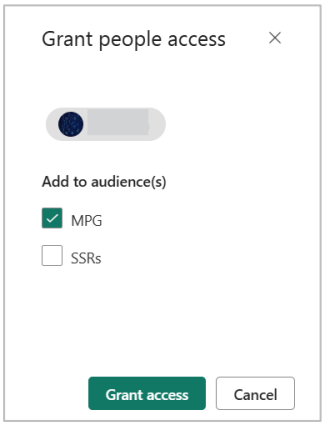

To approve a pending access request, follow the steps below:

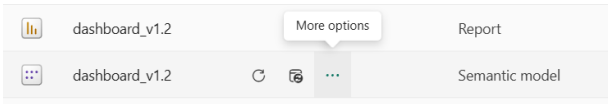

Step 1: Select the person to approve, check **GRANT A,** then click on **Grant access**

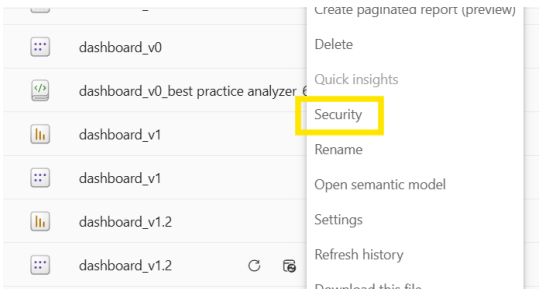

Step 2: To provide access to the background datasets, go to Workspace and click on **More options > Security**

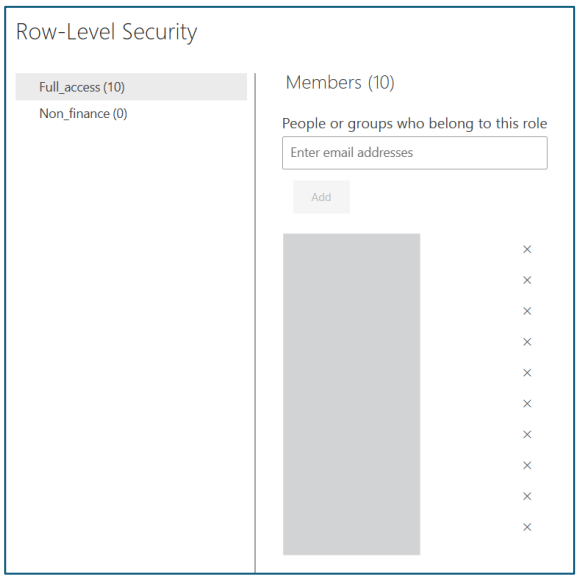

1.

2.

3.

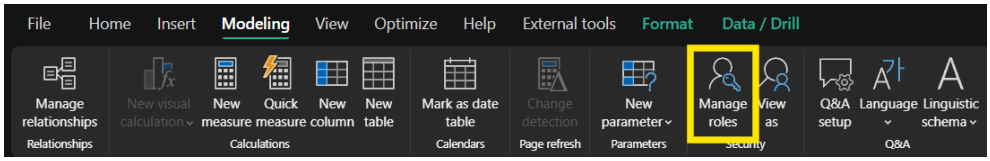

Step 3: **Enter email address** of the person to assigned role at Row-Level Security*. Currently, all the dashboard users are assigned to **Full-access** role. * *Refer to RLS section for more information*

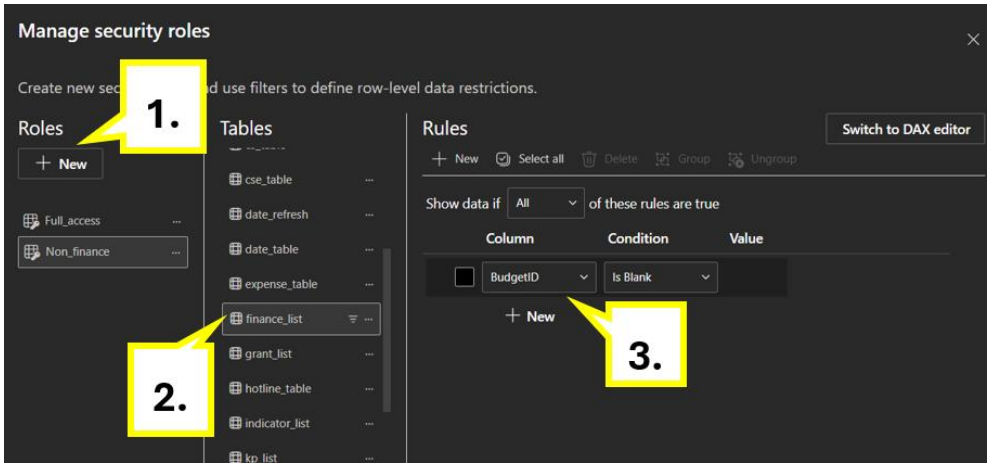

Row-level security (RLS)

Row-level security (RLS) is used to control what data users can see in the dashboard based on their assigned role. This ensures that financial data is only visible to authorized users. In this dashboard, two RLS roles are defined: **Full_access** and **Non_finance** where access to financial-related data is restricted.

Step 1: Got to **Modelling > Manage roles** in Power BI Desktop

Step 2: Click **+ New** to create a new role. Then, select the **finance_list** among **Tables**. Create a filter by clicking **+ New** under **Rules** and Save the rule.

Data export

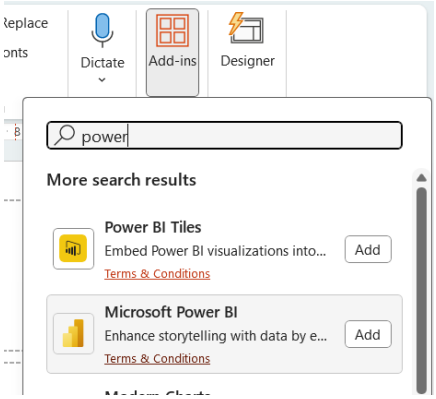

PDF (static)

Using the export function of Power BI Desktop and Power BI Service, dashboard pages can be exported in PDF format.

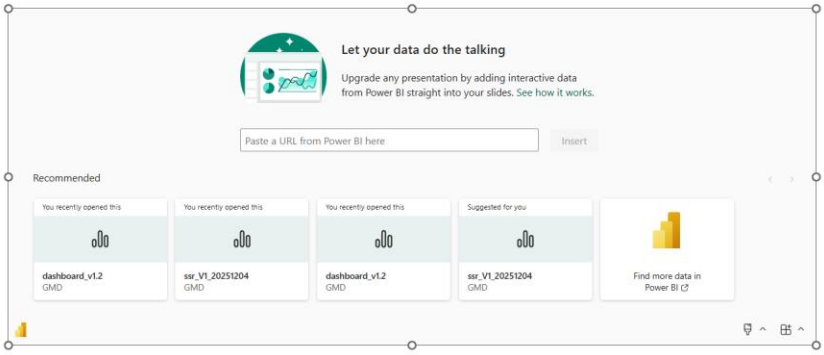

PowerPoint (live)

Live data can be embedded in the PowerPoint using following steps. Please be noted that one report page to be loaded at each time.

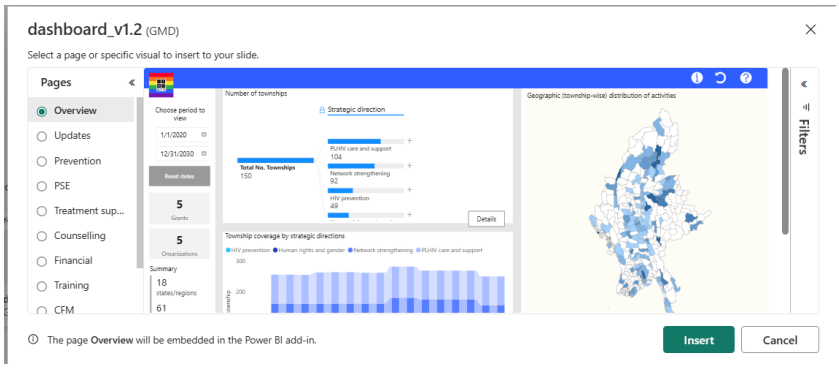

Step 1: In PowerPoint, go to **Home > Add-ins** and select **Microsoft Power BI**

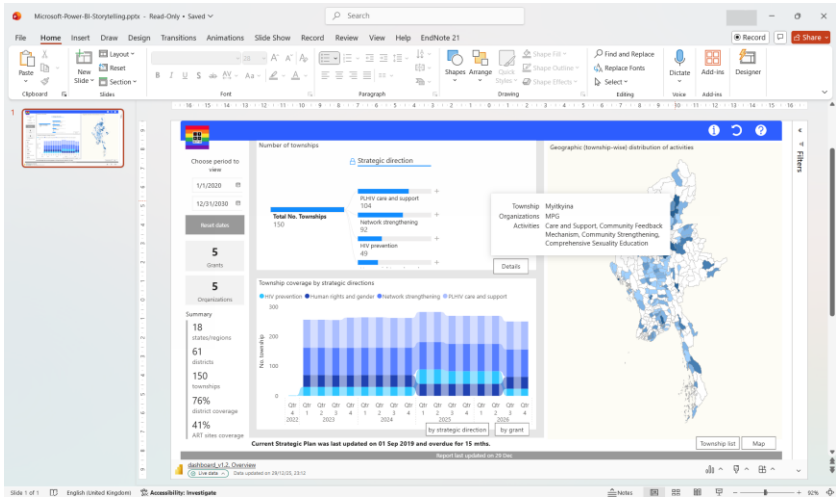

Step 2: List of reports from the workspace will be displayed. Select the report to include

Step 3: Choose a page from the report to display in PowerPoint

Step 4: To add a new page, add a new slide and repeat the steps above

3.5 Data updating

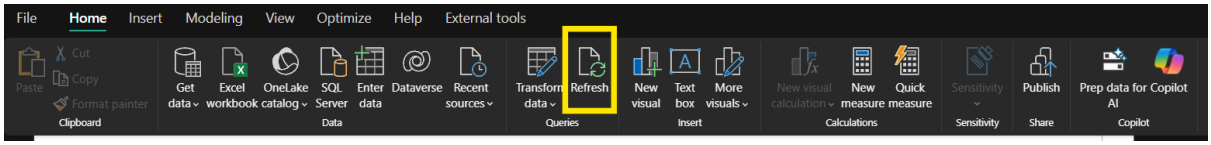

When new data is released, update the Excel workbook data source by following the guidance in **Section 3.2: Data Source - Data Extraction**. After updating the data source, follow the steps depending on how you are using Power BI; Desktop application or Service.

Power BI Desktop

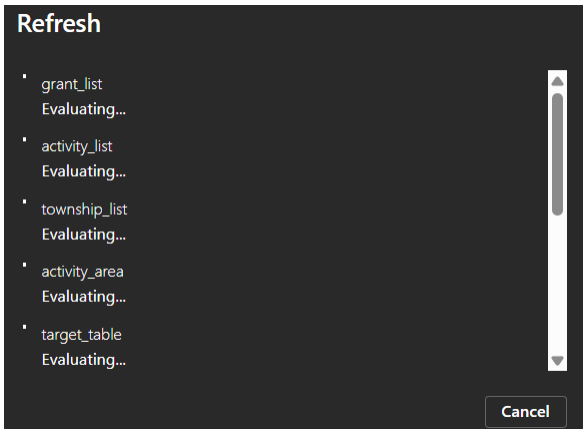

Refresh

Step 1: Open the desired Power BI file (**.pbix)** in Power BI Desktop

Step 2: Select **Home > Refresh** to load the latest data into the report tables

Step 3: Wait while loading datasets (progress window will appear while the data is being refreshed)

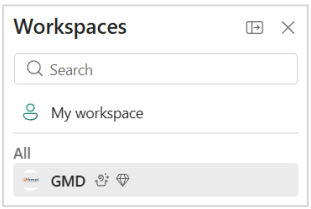

Power BI Service

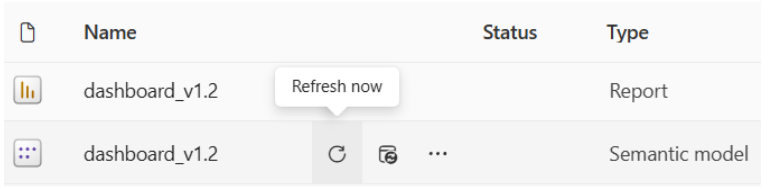

Refresh

Step 1: In the browser, go to Power BI Service (https://app.powerbi.com/)

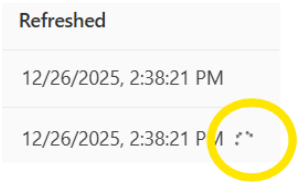

Step 2: Locate the workspace, **GMD**, where report and schematic model of the Grant Management Dashboard is kept.

Step 3: Click on **Refresh now**

Step 4: Wait until the refresh is done and **Refreshed** shows the current time

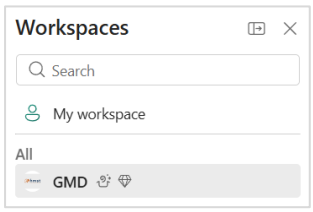

Schedule refresh

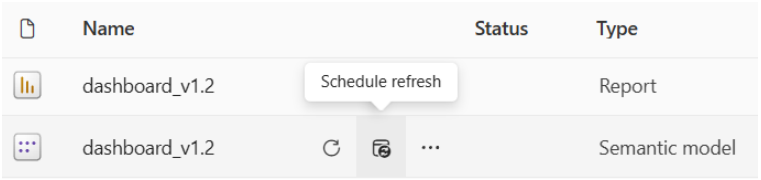

Data refresh is planned quarterly, following updates to the underlying datasets. As a result, no scheduled refresh is configured for this dashboard. If needed, Scheduled refresh is available at Power BI Service and follow the steps below to set up.

Step 1: In the browser, go to Power BI Service (https://app.powerbi.com/)

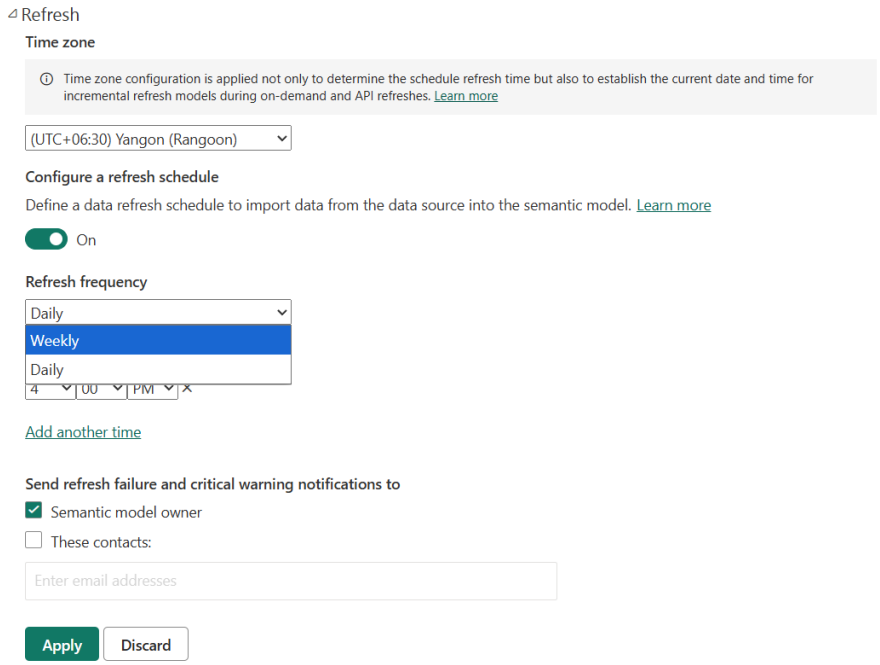

Step 2: Locate the workspace, **GMD**, where report and schematic model of the Grant Management Dashboard is kept.

Step 3: Click on **Schedule refresh**

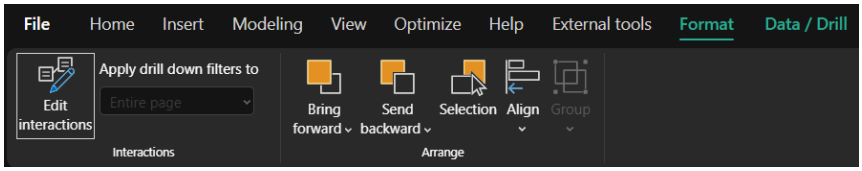

Step 4: Set up **time zone**, **frequency** and **time** to refresh, then click **Apply**

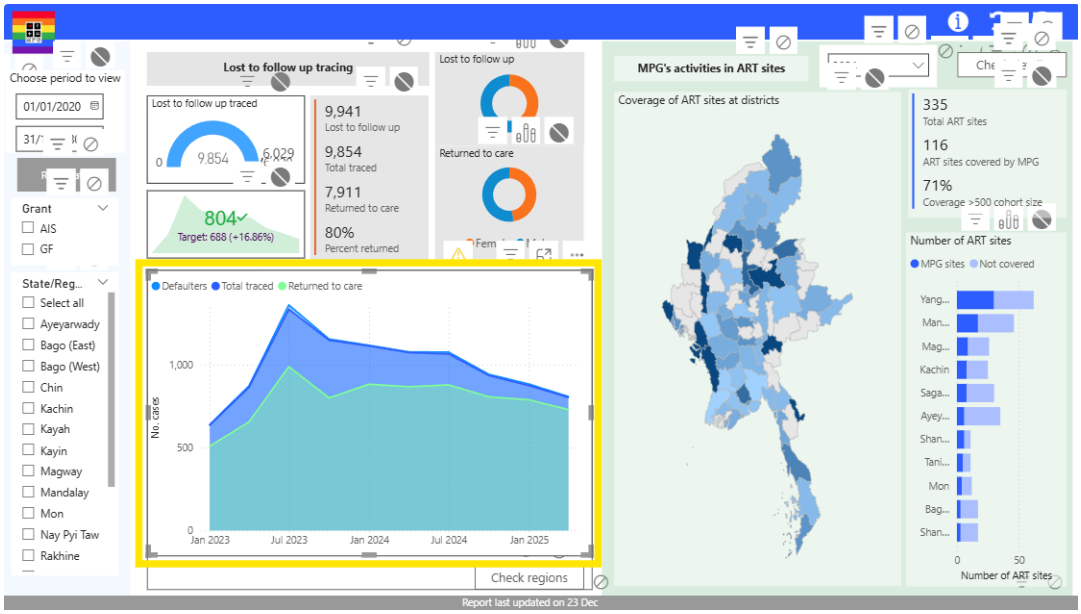

3.6 User experience

Cross-filtering

To prevent unnecessary filtering across visuals, **Format → Edit interactions** is used to control how visuals affect each other. For visuals that are not related, set the interaction to None.

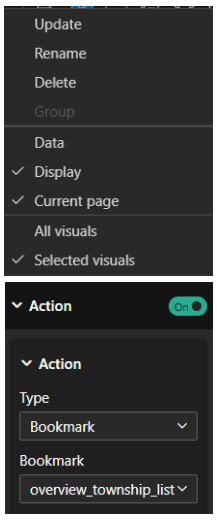

In the example below, interactions are set to **None** for other visuals when interacting with the line chart, because the date slicer is already used to filter the period to review.

Bookmarks

Elements such as predefined and customized action buttons are used to navigate to different bookmarks to enable users to swap between different visuals.

Example >
